What is the rule of 70 APES? Explanation of the Rule of 70 The formula is as follows: Take the number 70 and divide it by the growth rate. The result is the number of years required to double. For example, if your population is growing at 2%, divide 70 by 2. The result is 35; it will take 35 years for your population to double at a 2% growth rate.

Is APES harder than ap bio? Compared to AP bio, APES is a relatively easier class, therefore she could easily manage both if she takes it in one year. If she is taking honors biology, she should definitely take ap biology as it would make the class so much easier for her.

Is the APES exam curved? AP test scores are indeed "curved," but it's more accurate to call it a "scaling process." Instead of a traditional curve that compares your performance to other students' performance, the AP exam scaling process converts your raw score (the number of points you earned through multiple-choice questions and free- ...

What percent is a 5 on apes? Alternatively, you would need to have earned 71.3% of the total available composite points on the APES exam to score a 5. The multiple-choice section accounted for 60% of the total composite score while the free response section accounted for 40%.

How to calculate density in apes? 10) Density = mass / volume Calculate density; be able to recognize common units for mass and volume. 11) Input scientific notation correctly into your calculator. $M \times 10^n$ Scientific notation does not have to follow the strict format of M being between 1-9.9.

What is the formula for doubling time in apes? 10. Part Two: Doubling Times To calculate how long it takes a population to double, use the equation: DT (doubling

time) = $70 / r$ where r is the growth rate of the population (in a percent...do not convert to a decimal). Example: The doubling time of a population with a 2% growth rate is $70/2\% = 35$ years.

Do colleges care if you take APES? How much colleges care about AP Environmental Science depends on what the student plans to study once enrolled. For students interested in topics about the natural world, a high score on the AP exam signals to college admissions officers that applicants possess a solid understanding of the topic.
