Section 3.8.2: The Process of Digestion

1. Describe the primary function of the digestive system.

Answer: The digestive system is responsible for breaking down food into smaller molecules, which can then be absorbed and used by the body for energy and other functions.

2. List the four main organs of the digestive system and their functions.

Answer:

- **Mouth:** Chews and softens food, mixes it with saliva to form a bolus
- **Esophagus:** Moves the bolus to the stomach
- **Stomach:** Mixes and further digests food, produces gastric juices
- **Small intestine:** Absorbs most nutrients from food, produces digestive enzymes

3. Explain the role of enzymes in the digestive process.

Answer: Enzymes are proteins that catalyze specific chemical reactions in the body. In the digestive system, enzymes help break down complex molecules into simpler ones, such as carbohydrates into sugars and proteins into amino acids.

4. Describe the process of absorption in the digestive system.

CLOCKWORK PRINCE THE INFERNAL DEVICES 2 CASSANDRA CLARE

Answer: Absorption is the process by which nutrients from digested food are taken up into the bloodstream. Most absorption occurs in the small intestine, where nutrients are transported across the intestinal lining into the bloodstream. Specialized structures called villi and microvilli increase the surface area for absorption.

5. What is the function of the colon in the digestive system?

Answer: The colon is the final portion of the large intestine. It absorbs some water and electrolytes from undigested food, forming stool. The colon also houses beneficial bacteria that aid in digestion and produce vitamins, such as vitamin K.

What is the topic of math 4? In fourth grade, math instruction should focus on number theory and systems, algebraic thinking, geometrical figures and objects, measurement of length, weight, capacity, time, and temperature, and data analysis and probability.

What is learned in math 4? In fourth grade, students focus most on using all four operations - addition, subtraction, multiplication, and division - to solve multi-step word problems involving multi-digit numbers. Fourth-grade math extends their understanding of fractions, including equal (equivalent) fractions and ordering fractions.

What are the 4 main things in math? Addition, subtraction, multiplication and division. Knowing these basics is extremely helpful, especially when dealing with money.
