Why Do Clocks Run Clockwise and Other Imponderables: Exploring Life's Enigmas

By David Feldman

Question: Why do clocks run clockwise?

Answer: According to Feldman's book, "Why Do Clocks Run Clockwise and Other Imponderables," there is no definitive answer to this question. However, one possible explanation is that the direction of clock hands matches the direction of the sun's apparent motion across the sky. In the Northern Hemisphere, the sun moves from east to west, and clock hands rotate in the same direction.

Question: What's the origin of the "OK" hand gesture?

Answer: Feldman traces the gesture back to the 1830s, when it was used as shorthand for "Old Kinderhook," a nickname for then-President Martin Van Buren. The gesture was popularized by printers who used it to indicate that a page was ready to be printed.

Question: Why is lightning called "lightning"?

Answer: The word "lightning" is derived from the Old English word "lihtning," which means "a flash of light." This refers to the bright and sudden burst of light produced by an electrical discharge in the atmosphere.

Question: How many hairs are on a human head?

Answer: According to Feldman, the average human head has around 100,000 hairs. However, this number can vary significantly from person to person.

Question: Why do we say "bless you" when someone sneezes?

Answer: Feldman attributes this practice to a belief that sneezing releases evil spirits from the body. In the Middle Ages, people would say "God bless you" to protect the sneezer from these spirits. The tradition has persisted even though the original superstition is no longer widely believed.
