**How many miles do GSX-R600 last?** As long as you change the oil every 3000mi (2000 if you're anal), check the valves and adj when needed, replace the air filter and just keep up with general maintenance, there is no reason you can't get 100,000 out of a modern motorcycle motor.

**How many quarts of oil does a GSX-R600 take?** Capacity: 2.4L (2.5 qt) (When filter is not removed.) 2.6L (2.5 qt) (When filter is removed.)

**What RPM do you shift a GSX-R600?** I usually shift around 5,000 rpm or so on my 750, and maybe slightly higher on a 600. If you want the best mileage, shift at the lowest RPM you can without lugging the engine. If you want to accelerate fast, shift at a higher RPM.
