**Where do light reactions store chemical energy?** To summarize, note that the light reactions store chemical energy in ATP and NADPH, which shuttle the energy to the carbohydrate-producing Calvin cycle. The Calvin cycle is a metabolic pathway in which each step is governed by an enzyme, much like the citric acid cycle in cellular respiration.

**What is the source of energy that requires the electron in photosystem II?** Figure 8.2. 8: In the photosystem II (PSII) reaction center, energy from sunlight is used to extract electrons from water. The electrons travel through the chloroplast electron transport chain to photosystem I (PSI), which reduces NADP<sup>+</sup> to NADPH.

**What is the fastest way to memorize Biology?** Flash cards are a really good way to help with memorization. Biology is full of illustrations and they can be really helpful when learning how all the different components of a cell work together. Redrawing, tracing, labeling, or printing out diagrams are all helpful when figuring out the application of each term.

**Is Campbell biology good for beginners?** Campbell Biology is an excellent resource for any general biology course, offering a detailed overview of key

concepts, supported by vibrant illustrations. The standout feature is the end-of-chapter online quizzes that greatly assist in reinforcing understanding.

**Is Campbell Biology enough for Usabo?** The overall content of the USABO exams comes from the leading textbook in biology, Campbell and Reece's Biology. The best thing students can do to prepare for the competition is thoroughly study the textbook. Students should attempt to learn the charts and formulas in the book and be able to reproduce them.

**How to study Campbell effectively?** Read through each chapter of Campbell three times (before moving on to the next chapter): the first, to get a broad grasp of the situation; the second, to master (to the best of your ability) the concepts present; the third, to take notes on diagrams and concepts drawn mostly from your memory to ensure you understand ...

**How long should I study biology a day?** How long should I spend each day studying for the biology section? If you are following the 10-week schedule, the materials for each day can take between 4 and 7 hours to complete. You should aim to spend at least one hour per day on biology-related topics (though some days will be more and some days will be less).

**What are both ATP and NADPH required for?** Both ATP and NADPH are utilized in the phase of calvin cycle.

**Where are ATP and NADPH used?** ATP and NADPH are produced in the light reaction of photosynthesis. These are used in the biosynthetic pathway. There are also used in the Calvin cycle to reduce carbon dioxide.

**What will happen if ATP and NADPH are already used up at night?** ATP and NADPH are used in the light-dependent reactions of photosynthesis to produce glucose. If ATP and NADPH are already used up at night, the plant will not be able to produce glucose because these molecules are necessary for the process.

**How many ATP and NADPH are produced in light reactions?** During one cycle of light reaction in photosynthesis, 2 ATP and 2 NADPH molecules are produced. This occurs through the process of photophosphorylation, where the energy from light is used to generate ATP and NADPH molecules.

**What replaces the electrons excited by sunlight in photosystem I?** Answer and Explanation: The electrons excited by sunlight are replaced by electrons from PHOTOSYSTEM II in photosystem I through an electron transport chain connecting them.

**What is the most important role of pigments in photosynthesis?** Answer and Explanation: The main function of pigments (i.e. chlorophyll, carotenoids, anthocyanin) in photosynthesis is the absorption of light for use in exciting electrons in the pigments, which set off a series of reactions that enable photosynthesis to start.

**Is FCE harder than IELTS?** Though IELTS/TOEFL are more popular, they are also easier. In fact, IELTS isn't even a proficiency test as natives speakers can also take it. Unfortunately, as usual, the best isn't the most recognised. However, FCE is more thorough self fulfilling and is valid for life,unlike IELTS/TOEFL.

**How do I get my C1 from FCE?** Students scoring 180 or above on the B2 First will receive a Cambridge English Certificate for level C1.

**Is B2 fluent or C1?** At this stage, you can use English day-to-day for business (using specialized business English vocabulary) and academic purposes. If B2 is what many consider “fluent,” then C1 is fluency with increased nuance and understanding.

**Can I get C1 with B2?** B2 First – Level C1 Exceptional candidates sometimes show ability beyond B2 level. If you achieve a scale score of 180–190 (grade A) in your exam, you will receive the First Certificate in English stating that you demonstrated ability at Level C1.

**What FCE level is IELTS?** The General English and the CEFR levels both correspond to a specific score in the Cambridge tests scale and a particular band in IELTS. An intermediate student with level B1 would get band 4 in IELTS or a passing score in PET. Similarly, a successful FCE candidate would have a band 5.5-6.0 in IELTS.

**Can you fail FCE?** Can I fail the exams? FCE / CAE - In one word: yes. You will receive a grade A – C in both exams, they work as follows.

**Is B2 level enough for work?** A B2 level of English would allow you to function in the workplace in English, and indeed, many non-native English speakers in international workplaces have this level of English. A person working in English at a B2 level will, however, lack nuance particularly outside his own field.

**What level of English is FCE?** The FCE. The First Certificate in English (FCE) or B2 First is a test administered by Cambridge Assessment. The FCE is meant to assess at the B2 level of the Common European Framework of Reference (CEFR).

**Can you retake FCE?** If you fail your FCE, don't think of it as the end of the fight. You may still have options, and you are not alone. You still have the right to appeal the evaluation results, which means you must retake the test. You should consult your disability insurance attorney for help if you haven't done so.
