

FOOD CHAIN STUDENT GIZMO

ANSWERS

[Download Complete File](#)

What is the answer to the complete food chain? Answer: The food chain will go as following: Producer to primary consumer to secondary consumer to tertiary consumer and the top consumer.

What does a food chain show answer? Answer and Explanation: A food chain represents the "flow of energy" through an ecosystem, in the form of food. It starts with producers, which take energy from some environmental source and store it as food. The most common example is plants and algae using photosynthesis, but that does not have to be the case.

What is food chain gizmo? In the Food Chain Gizmo, students explore an ecosystem of hawks, snakes, rabbits, and grass. Disease can be introduced for any species, and the number of animals can be increased or decreased at any time, just like in the real world.

What is the answer to the food web and food chain? Food chain is a linear sequence of organisms which starts from producer organisms and ends with decomposer species. Food web is a connection of multiple food chains. Food chain follows a single path whereas food web follows multiple paths. From the food chain, we get to know how organisms are connected with each other.

What is the correct order of the food chain? Answer and Explanation: The order of a food chain looks like this: sun (or light energy), primary producers, primary consumers, secondary consumers, and tertiary consumers. In a typical food chain, all energy comes from the sun originally.

Which is the complete food answer? Answer: Milk is dubbed as the complete food because it packs all essential nutrients like carbs, proteins, fats, fibers and essential vitamins.

What is food chain short answers? The food chain is a linear sequence of organisms where nutrients and energy is transferred from one organism to the other. This occurs when one organism consumes another organism. It begins with the producer organism, follows the chain and ends with the decomposer organism.

What are 5 food chain examples?

What does a food chain start with answer? Complete answer: A food chain always begins with plant life and ends with an animal. Plants are called producers because they're able to use light energy from the Sun to supply food (sugar) from carbon dioxide and water. The process by which plants make food is called photosynthesis.

What food is a gizmo?

What is a gizmo example? While gizmo often means an unknown object — like a thingamajig — a gizmo is any device that gets a job done. A phone is a gizmo for talking to people. A stove is a gizmo that cooks food. A hammer is a gizmo that pounds in nails.

What is a food chain Brainpop?

How to explain food chain to a child? All living things need energy to live and grow, and the flow of energy from one organism to another is called a food chain. Starting the food chain are producers, which are plants, fruits, and vegetables that make their own energy from the sun. Consumers eat producers and get their energy from them.

What describes a food chain? A food chain describes how energy and nutrients move through an ecosystem. At the basic level there are plants that produce the energy, then it moves up to higher-level organisms like herbivores. After that when carnivores eat the herbivores, energy is transferred from one to the other.

What starts a food chain? A food chain always starts with a producer. This is an organism that makes its own food. Most food chains start with a green plant, because plants can make their food by photosynthesis. A living thing that eats other plants and animals is called a consumer.

What are the 3 main parts of a food chain? The parts of a food chain are producers, consumers, and decomposers. Producers are plants that produce, or create, their own food by using light energy from the sun, carbon dioxide from the air, and water from the soil.

What is the 3 food chain? one of three positions on the food chain: autotrophs (first), herbivores (second), and carnivores and omnivores (third).

What is the answer to the top of the food chain? The top of the food chain is called the apex predator. The apex predator is typically a carnivore, or an organism that eats another organism. They are important for the ecosystem because they help control the population density of other species. Some examples of apex predators are wolves or killer whales.

What are the three groups of food? The three main food groups are- Carbohydrate, Protein and Fat. provides proper energy to our body. We use this energy to walk, talk, think even breathe. providing proper nutrients in correct amount.

Which food is called a junk food? fast foods (such as hot chips, burgers and pizzas) chocolate and sweets. processed meat (such as bacon) snacks (such as chips) sugary drinks (such as sports, energy and soft drinks)

Why is milk called a balanced diet? There's a good reason milk is considered a basic part of a healthy, balanced diet. "It has nutrients your body needs, like calcium, vitamin D and potassium," says Dr. Chen. However, it's not the only food that provides these building blocks for a well-balanced diet.

What is a complete food chain? The food chain is a linear sequence of organisms where nutrients and energy is transferred from one organism to the other. This occurs when one organism consumes another organism. It begins with the producer organism, follows the chain and ends with the decomposer organism.

What is the answer to the top of the food chain? The top of the food chain is called the apex predator. The apex predator is typically a carnivore, or an organism that eats another organism. They are important for the ecosystem because they help control the population density of other species. Some examples of apex predators are wolves or killer whales.

What is the true end of any food chain answer? Answer: Decomposers are the true end of any food chain. Decomposers get energy from waste or dead organic material. The last stage in the food chain consists of decomposers. The dead and the decaying matter is broken down by decomposers.

Is there an end to the food chain? Answer and Explanation: A food chain is a continuous flow of energy, and even when species die out, energy will be continuously transferred. Thus, while a food chain can evolve, as long as the sun is in existence, it will never cease.

SATP2 Biology 1 Review Answers

Question 1: What is the function of DNA? **Answer:** DNA stores and transmits genetic information.

Question 2: Describe the process of transcription. **Answer:** Transcription is the process by which DNA is copied into RNA by the enzyme RNA polymerase. The RNA molecule then carries the genetic information to the ribosomes for translation into protein.

Question 3: What is the difference between genotype and phenotype? **Answer:** Genotype refers to the genetic makeup of an organism, while phenotype refers to its observable traits. Phenotype is influenced by both genotype and environmental factors.

Question 4: Explain the role of enzymes in biological processes. **Answer:** Enzymes are proteins that catalyze chemical reactions in the body. They increase the rate of reactions without being consumed themselves.

Question 5: Describe the structure and function of cell membranes. **Answer:** Cell membranes are composed of a phospholipid bilayer. They regulate the movement of

substances into and out of the cell, maintain cell shape, and facilitate communication between cells.

What is Visual Basic 2012 used for? Visual Basic 2012's strength lies in its ease of use and the speed at which you can create Windows Forms and Windows 8 applications, WPF Windows applications, Web applications, WPF Browser applications, mobile device applications, and Web Services.

Is Visual Studio 2012 still supported? Visual Studio 2012 extended support ends on January 10, 2023 for the IDE and its associated products, runtimes, and components. We recommend users upgrade to a newer version of Visual Studio. See below for more information. Visual Studio 2013 remains in extended support through April 9, 2024.

Is Visual Studio 2012 free? You can download Visual Studio 2012 from [My.VisualStudio.com](https://my.visualstudio.com). [My.VisualStudio.com](https://my.visualstudio.com) requires a free Dev Essentials subscription, or a Visual Studio Subscription.

Can I delete Visual Studio 2012? To uninstall Visual Studio, follow these steps: Open Programs and Features in the Control Panel (formerly known as Add or Remove Programs, or ARP). Alternatively, you can open it as follows. Click Run on the Start menu (Start + R).

Is VB still used? In fact, VB remains one of the most popular programming languages. Companies all over the world rely on VB programmers to develop applications to perform critical business functions.

Is Visual Basic still used in 2024? Manufacturing companies that have developed custom production management systems, inventory tracking tools, or automation solutions using VB6 are among the prominent users of the language in 2024.

Is Visual Studio 2013 end of life? Visual Studio 2013 remains in extended support until April 9, 2024. During extended support we'll provide fixes only for security issues. You must be using Update 5 to remain under support. Visual Studio 2015 remains in extended support through October 14, 2025.

Is Visual Studio 2012 compatible with Windows 7? As far as I know that Visual studio 2012 could be installed on windows 7.

Is Visual Studio still good? Visual Studio is the best IDE to build rich, beautiful, cross platform applications for Windows, Mac, Linux, iOS, and Android. Build rich clients apps using a range of technologies such as; WinForms, WPF, WinUI, MAUI, or Xamarin.

What is Visual Basic mostly used for? It is used to create GUI based desktop applications, mobile applications and web services. Summary: Visual Basic is a Microsoft-developed programming language. Used to create Windows desktop apps, mobile apps, and web services.

What is Visual Basic editor used for? Microsoft Visual Basic for Applications (VBA) enables non-programmers to record, create, and edit macros that can automate tasks in Office applications.

Is Visual Basic the same as VBA? As its name suggests, VBA is closely related to Visual Basic and uses the Visual Basic Runtime Library. However, VBA code normally can only run within a host application, rather than as a standalone program. VBA can, however, control one application from another using OLE Automation.

What is the function of Microsoft Visual Basic? Visual Basic is a programming environment that allows rapid development of web and mobile apps and web services. Learn more about Visual Basic. Visual Basic (VB) is defined as an object-oriented language and development environment developed by Microsoft in 1991.

Tawaran Sebut Harga Laman Web Rasmi Kementerian

Soalan 1: Di manakah saya boleh mendapatkan maklumat mengenai tawaran sebut harga laman web rasmi kementerian?

Jawapan: Maklumat mengenai tawaran sebut harga laman web rasmi kementerian boleh didapati di laman web rasmi kementerian yang berkenaan. Tawaran sebut harga biasanya diiklankan di bahagian "Perolehan" atau "Berita Terkini" di laman web tersebut.

Soalan 2: Apakah syarat kelayakan untuk menyertai tawaran sebut harga?

Jawapan: Syarat kelayakan berbeza-beza bergantung kepada kementerian yang mengeluarkan tawaran sebut harga. Beberapa syarat umum termasuk mempunyai pengalaman yang terbukti dalam pembangunan laman web, memiliki pasukan teknikal yang berkelayakan, dan memenuhi syarat kewangan tertentu.

Soalan 3: Bagaimana cara mendapatkan dokumen tawaran sebut harga?

Jawapan: Biasanya, dokumen tawaran sebut harga boleh dimuat turun dari laman web kementerian atau diperoleh dengan menghantar permintaan rasmi melalui e-mel. Dokumen tersebut akan mengandungi maklumat mengenai skop kerja, garis masa projek, dan syarat penilaian.

Soalan 4: Bagaimanakah cara menghantar sebut harga?

Jawapan: Sebut harga hendaklah dikemukakan dalam format yang ditentukan oleh kementerian, biasanya melalui e-mel atau platform perolehan dalam talian. Pastikan untuk mematuhi semua arahan dan tarikh akhir yang dinyatakan dalam dokumen tawaran sebut harga.

Soalan 5: Apakah kriteria penilaian yang digunakan untuk memilih pemenang tawaran sebut harga?

Jawapan: Kriteria penilaian bervariasi bergantung kepada kementerian. Namun, secara amnya, kriteria tersebut merangkumi harga, kualiti cadangan teknikal, pengalaman kontraktor, dan kemampuan kewangan. Kementerian akan menilai sebut harga yang diterima dan memilih pemenang yang memenuhi kriteria terbaik.
