- **Subjective problems:** Conditions that are perceived as problematic but may not objectively harm individuals. Examples include racism, sexism, or discrimination.
- **Constructed problems:** Issues that are defined as problems by powerful groups in society to advance their interests, even if they may not necessarily represent genuine social concerns.

##### **Question 3: How does social inequality contribute to social problems?**

**Answer:** Social inequality creates disparities in opportunities, resources, and access to essential services. This can lead to a range of problems, including limited access to education, healthcare, and employment, which in turn can perpetuate poverty,

crime, and health issues.

- **Political and social resistance:** Efforts to solve social problems may face opposition from groups who benefit from maintaining the status quo.
