First of all, guided discovery can be time-consuming, especially when compared to more traditional teaching methods. Planning and conducting inquiry-based activities may require more extensive preparation and class time.

What is the difference between guided discovery method and problem-solving method? - Guided discovery focuses on problem solving, while guided exploration encourages exploration. - Guided discovery emphasizes finding solutions, guided exploration emphasizes exploring concepts. - Guided discovery focuses on uncovering goals in data exploration.

What is the difference between guided discovery and inquiry-based learning? In discovery learning, the teacher attempts to preserve the pretence of discovery, even to the extent of withholding knowledge; in inquiry, the teacher, as a participant in the classroom activity, aims to introduce subject-specific knowledge when it is most relevant and meaningful to her students.
