

# ROUGHING IT ON THE OREGON TRAIL TIME TRAVELING TWINS 1

## [Download Complete File](#)

**What states did the Oregon Trail go through?** Where is the Oregon National Historic Trail? The Trail passes through the following seven states: Missouri, Kansas, Nebraska, Wyoming, Idaho, Oregon, and Washington.

**What did pioneers travel in to get to Oregon?** Pioneer families carried all of their possessions in wagons that were only about ten feet long and four feet wide. They were called "prairie schooners" because the canvas cover looked like a ship's sail. Most wagons were pulled by oxen.

**What motivated settlers to travel to Oregon?** Free land in Oregon and the possibility of finding gold in California lured them westward. At the same time, eastern churches wanted to teach American Indians of the Oregon Country their European ideas of "civilization." Many simply hoped for a chance to start a new life.

**Did the Oregon Trail go through Twin Falls Idaho?** From the present site of Pocatello the trail proceeded almost due west on the south side of the Snake River for about 180 miles (290 km). On this route they passed Cauldron Linn rapids, Shoshone Falls, two falls near the present city of Twin Falls, Idaho, and Upper Salmon Falls on the Snake River.

**What was the disease most feared by travelers on the Oregon Trail?** Cholera was the main scourge of the trail. It could attack a perfectly healthy person after breakfast and he would be in his grave by noon. However, many would linger in misery for weeks in the bouncy wagons.

**Does any of the Oregon trails still exist?** Historians estimate that about 300 of the original 2,000 miles (480 of 3,200 km) of the Oregon Trail remain untouched. The rest of it has been lost to time or development—in many places, roads and highways were built directly over the popular route, such as Oregon's stretch of U.S. 26 along the Barlow Road route.

**How did people go to the bathroom on a wagon train?** They dug holes in the ground for toilets. Many emigrants probably didn't wash their hands afterward. Rain washed the contents of the holes into the streams or rivers.

**What time did pioneers go to bed?** Pioneers typically went to sleep at dusk since, without light, not much could be accomplished. Candles and lanterns were expensive and not to be wasted.

**What was the main cause of death on the Oregon Trail?** Death was an ever-present companion. It is estimated that as many as 1 in 10 emigrants died on the trail—between 20,000 and 30,000 people. The majority of deaths occurred because of diseases caused by poor sanitation. Cholera and typhoid fever were the biggest killers on the trail.

**What was Oregon called before it became a state?** — Before Oregon was the 33rd state admitted to the United States in 1859, it was known as the Oregon Territory, and before that, the Oregon Country.

**Who were the first white settlers in Oregon?** John Jacob Astor, as the head of the Pacific Fur Company, began European American settlement of the Oregon country with the establishment of a trading post at Astoria in 1811.

**Why didn't most pioneers ride in their wagons?** Rough roads and wagons without springs made for a very bumpy ride, and wagons were filled with supplies which left little room for passengers. Generally, travelers only rode in wagons when too ill or tired to walk, and slept most nights in tents or bedrolls outside the wagon.

**Why is Twin Falls Idaho called the Magic Valley?** They're located in the region known as the Magic Valley, named for the early settlers who “magically” transformed this arid, largely uninhabitable land into a lush, agricultural paradise by irrigating their fields with water from the nearby Snake River.

---

**Why are Twin Falls called Twin Falls?** Twin Falls, on the Snake River a little over five miles upstream from the eponymous city (and about two and a half miles upstream from Shoshone Falls), consists of similar-sized falls in chutes on either side of a stubby basalt pillar. Hence the name was particularly appropriate.

**How hard is it to hike Twin Falls?** Generally considered a moderately challenging route, it takes an average of 53 min to complete. This is a very popular area for hiking, so you'll likely encounter other people while exploring. The trail is open year-round and is beautiful to visit anytime.

**What was the deadliest thing on the Oregon Trail?** Nearly one in ten who set off on the Oregon Trail did not survive. The two biggest causes of death were disease and accidents.

**How many bodies are buried along the Oregon Trail?** There were an estimated 300,000 pioneers that traveled the road which means approximately 15,000 were buried along the trail side. The state of Wyoming has records of those that are known. Some of the names on this list include family history and how they died.

**How long did it typically take for a wagon train to travel the Oregon Trail?** Between 1840 and 1860, from 300,000 to 400,000 travelers used the 2,000-mile overland route to reach Willamette Valley, Puget Sound, Utah, and California destinations. The journey took up to six months, with wagons making between ten and twenty miles per day of travel.

**Do wagon ruts still exist?** Heavy wagons being pulled forward by livestock dug into the ground, creating ruts. These ruts were deepened and lengthen by wagons wet from river crossings, which made the ground muddy. The ruts were maintained, and grew, by the thousands of wagons that traveled through this area. They can still be seen today.

**How deep are the ruts in the Oregon Trail?** The ridge's soft sandstone was no match for thousands of iron-shod wheels and hooves and quickly eroded. By the time Oregon Trail travel ended, ruts five feet deep had been chewed into the rock.

**Can you still see graves along the Oregon Trail?** A number of these emigrant graves can still be found along the trails and through the dedicated research of some

OCTA volunteers, the history of the deceased has been reconstructed and markers have been placed.

**What was the main cause of death to pioneers on the trail?** Death on the Trail  
Death was an ever-present companion. It is estimated that as many as 1 in 10 emigrants died on the trail—between 20,000 and 30,000 people. The majority of deaths occurred because of diseases caused by poor sanitation. Cholera and typhoid fever were the biggest killers on the trail.

**How many days did it take to walk the Oregon Trail?** Perhaps some 300,000 to 400,000 people used it during its heyday from the mid-1840s to the late 1860s, and possibly a half million traversed it overall, covering an average of 15 to 20 miles (24 to 32 km) per day; most completed their journeys in four to five months.

**What ended the Oregon Trail?** Oregon City, Oregon The official end of the Oregon Trail! After making the long and exhausting journey west, pioneers would file their land claim at the Government Land Office in Oregon City.

**What was the real route of the Oregon Trail?** The Oregon Trail was a wagon road stretching 2170 miles from Missouri to Oregon's Willamette Valley. It was not a road in any modern sense, only parallel ruts leading across endless prairie, sagebrush desert, and mountains.

### **Navigating SHL Verbal Reasoning Tests: A Comprehensive Guide with Solutions**

SHL verbal reasoning tests are renowned for their comprehensive assessment of candidates' verbal comprehension and reasoning abilities. These tests typically comprise a range of question types, each designed to evaluate different aspects of language proficiency. To excel in these tests, a thorough understanding of the question types and effective strategies is crucial.

#### **Type 1: Critical Reasoning**

Questions in this category assess your ability to analyze arguments, identify flaws, and draw logical conclusions. One common question type is the "assumption" question, which requires identifying an underlying assumption supporting the argument. For example:

**Question:** The new product will revolutionize the market due to its advanced features.

**Answer:** The argument assumes that advanced features guarantee market success.

#### **Type 2: Reading Comprehension**

---

These questions test your comprehension of written passages. You may be asked to summarize a passage, answer specific questions about the content, or interpret the author's purpose or tone. For instance:

**Passage:** The company's decision to prioritize environmental sustainability has led to a significant increase in operating costs.

**Question:** What is the main reason for the rise in operating costs?

**Answer:** The company's focus on environmental sustainability.

### **Type 3: Verbal Analogies**

Verbal analogies measure your ability to recognize relationships between words. You will be given a pair of words and asked to identify a third word that shares a similar relationship with the first one. For example:

**Question:** Doctor : Patient :: Teacher : ?

**Answer:** Student

### **Type 4: Sentence Completion**

These questions test your vocabulary and grammatical skills. You will be provided with an incomplete sentence and asked to choose the best word or phrase to complete it accurately. For instance:

**Question:** The company's financial performance was \_\_\_\_ due to the recent market downturn.

**Answer:** Adversely affected

### **Type 5: Word Usage**

Questions in this category evaluate your understanding of word meanings and their appropriate usage in context. You may be asked to identify the correct word choice or explain the meaning of a specific word. For example:

**Question:** The project's progress has been \_\_\_\_ by unforeseen circumstances.

---

**Answer:** Hindered

## **Understanding Motivation and Emotion: A Guide to the 5E Model**

### **1. What is the 5E Model of Motivation and Emotion?**

The 5E Model, proposed by Johnmarshall Reeve in his book "Understanding Motivation and Emotion," is a theoretical framework that explores the intricate relationship between motivation and emotion. It posits five key elements that interact to shape our behaviors and emotional experiences.

### **2. The Five Elements of the 5E Model**

The 5E Model consists of:

- **Environment:** External stimuli, such as rewards, punishments, and social interactions, that influence our motivations and emotions.
- **Expectation:** Beliefs about the potential outcomes of our actions and the rewards or costs associated with them.
- **Emotion:** The subjective experience of psychological and physiological changes in response to external stimuli or internal thoughts.
- **Behavior:** The observable actions we take as a result of our motivations and emotions.
- **Personal Characteristics:** Individual traits, such as personality, beliefs, and values, that influence our motivations and emotional responses.

### **3. How the 5E Model Works**

The 5E Model suggests that motivation and emotion are interconnected and mutually influential. External stimuli (Environment) can trigger expectations (Expectation) which in turn evoke emotions (Emotion). These emotions motivate us to engage in certain behaviors (Behavior) that we believe will lead to desired outcomes. Our personal characteristics (Personal Characteristics) shape how we interpret and respond to these stimuli and emotions.

### **4. Implications for Practice**

Understanding the 5E Model can provide valuable insights for practitioners in fields such as education, psychology, and management. By identifying and manipulating the elements of the model, practitioners can enhance motivation and facilitate positive emotional experiences. For example, teachers can create stimulating learning environments (Environment) that foster positive expectations (Expectation) and motivate students to engage in desired behaviors (Behavior).

## 5. Conclusion

The 5E Model of Motivation and Emotion provides a comprehensive framework for understanding the complex interplay between these two fundamental aspects of human behavior. By considering the five elements of the model, we can gain a deeper understanding of our own motivations and emotions, as well as improve our ability to motivate and support others.
