The Procrastination Equation: How to Stop Putting Things Off and Start Getting Stuff Done

In his book "The Procrastination Equation," Piers Steel delves deep into the psychology of procrastination and offers practical strategies to overcome it.

Q: What is the "procrastination equation"?

A: Steel's equation is $U + E + V < H$. It suggests that procrastination occurs when the perceived unpleasantness (U) and effort (E) of a task outweigh the subjective value (V) of the task and our expectation of success (H).

Q: How do I determine the U, E, V, and H factors for a task?

THE ANIMATORS SURVIVAL KIT EXPANDED EDITION A OF METHODS PRINCIPLES AND FORMU

A: To calculate U, consider how aversive you find the task. For E, estimate the amount of work and difficulty involved. V represents the personal importance and potential benefits of the task. H measures your confidence in your ability to complete it successfully.

Q: What can I do if the equation is not in my favor?

A: If $U + E + V < H$, you may find yourself procrastinating. To shift the equation in your favor, you can:

- **Change your perspective:** Reframe the task to make it seem less unpleasant or effortful.
- **Break down the task:** Divide it into smaller, more manageable chunks.
- **Focus on the value:** Remind yourself of the benefits of completing the task.
- **Set realistic expectations:** Adjust your H factor to reflect your actual capabilities.

Q: Are there any other strategies I can use?

A: In addition to the equation approach, Steel recommends:

- **The "two-minute rule":** If a task takes two minutes or less to complete, do it immediately.
- **The "Pomodoro technique":** Alternate focused work sessions (25 minutes) with short breaks (5 minutes).
- **The "eat the frog":** Tackle the most daunting task first thing in the morning.

Q: What are the benefits of overcoming procrastination?

A: Breaking the procrastination cycle can lead to:

- Increased productivity and efficiency
- Reduced stress and anxiety
- Greater sense of accomplishment and satisfaction
- Improved relationships and self-esteem

The Mouth That Begg: Hunger, Cannibalism, and the Politics of Eating in Modern China

Introduction In post-contemporary China, the politics of eating have taken on new dimensions. The rise of a globalized economy and the spread of consumer culture have brought about stark inequalities, leading to a stark divide between those who have and those who do not. This article explores the interplay of hunger, cannibalism, and the politics of eating in modern China, raising questions about food, agency, and the human condition.

Question 1: How has hunger been used as a political tool in China? Answer: Hunger has been both a consequence and a weapon of political struggles in China. During the Great Leap Forward (1958-1962), collectivization and forced industrialization led to widespread famine. The government's suppression of reports of starvation contributed to the deaths of millions. More recently, hunger has been used as a justification for authoritarianism, with the Chinese Communist Party claiming that its rule is necessary to prevent social unrest and ensure food security.

Question 2: What is the significance of cannibalism in Chinese history and culture? Answer: Cannibalism has been documented in China as early as the Neolithic period. In the face of extreme hunger, people have resorted to consuming human flesh as a means of survival or protest. The Chinese government has historically sought to suppress and conceal instances of cannibalism, often portraying it as a primitive or pathological behavior. However, some scholars argue that cannibalism can also be seen as a form of resistance against authority and the dehumanizing effects of poverty and inequality.

Question 3: How has the rise of consumerism affected the politics of eating in China? Answer: The rapid growth of China's economy has led to increased consumption, including of food. While some have benefited from this abundance, it has also exacerbated disparities and food waste. The commodification of food has turned it into a symbol of status and privilege, contrasting sharply with the experiences of those who still struggle to meet their basic needs.

Question 4: What interventions are being made to address hunger and malnutrition in China? Answer: Various government and non-governmental organizations are working to combat hunger and improve nutrition in China. These efforts include providing food assistance, promoting sustainable agriculture, and investing in education and healthcare. However, challenges remain, such as the need for more inclusive policies, greater transparency, and a shift towards a more equitable food system.

Conclusion The politics of eating in modern China are complex and multifaceted. Hunger and cannibalism have been both symptoms and catalysts of social and political upheaval. The rise of consumer culture has brought new challenges, highlighting the need for interventions that address both the physical and political dimensions of food security. Understanding the interplay of hunger, cannibalism, and the politics of eating is crucial for confronting the enduring challenges of food scarcity and inequality, and for fostering a more just and sustainable society.
