**Who is the main killer in And Then There Were None?** Justice Wargrave is the clever murderer in the mystery novel And Then There Were None by Agatha Christie. He is described as an old and terminally ill man, and the other characters compare his appearance to both a frog and turtle.

**What happened in chapter 8 and there were none?** Summary: Chapter 8 It turns out that Lombard has a revolver, which surprises Bloore. As they make their search, the men come across a dazed MacArthur sitting by himself, staring off into the sea. He tells them that there is very little time and that they need to leave him alone. They decide that he must be crazy.

**Who is Mackenzie in And Then There Were None?** General John Gordon MacArthur (or McKenzie) GMG DSO is a character from the 1939 novel And Then There Were None. In the novel, MacArthur was a retired British Army officer who was invited to Soldier Island by U. N. Owen to reunion with on some old colleagues from the First World War.

**What happened in chapter 16 in And Then There Were None?** Chapter 16 Vera and Lombard find Armstrong's body on the beach. Vera points Lombard's revolver on him, at which point Lombard lunges toward her only to be shot dead. Vera returns home and thinks of Hugo, the man she loved, and goes upstairs where she finds a noose hanging from a hook, and she decides to hang herself.

**Why does Vera shoot Lombard?** Lombard does not believe that women are capable of homicidal behavior. As such, Vera tricks and shoots him at the end of the novel, even though he ruled everyone else out as the murderer.

**Who killed Wargrave?** As said previously, in this wonderful novel by Christie, it is revealed in the post-script that the killer is actually Justice Lawrence Wargrave, who faked his death halfway into the novel (with the help of Dr. Armstrong), and then shot himself, arranging his suicide to match his supposed earlier death.

**Why doesn't Lombard believe that Mrs. Rogers killed herself?** Why doesn't Lombard believe that Mrs. Rogers killed herself? Because they thought Anthony Marston killed himself but two suicides and 12 hours is too much. What do Lombard and Armstrong conclude about the nursery rhyme?

**Why does Lombard suspect Judge Wargrave?** Lombard thinks that it is Wargrave because he has played God as a judge for so long that this must have gotten to his head. Lombard sees Wargrave's authoritative tendencies as condemning. Vera thinks that it is Dr. Armstrong because two of the deaths have both been by poison.

**Who dies in ch 15 and then there were none?** Vera had suspected that Armstrong's earlier disappearance was a red herring, or false clue, meant to trick them into thinking he was dead, but while trying to find a hiding spot to wait out the night, Vera and Lombard see Armstrong's body -- dead and drowned.

**Who is the fifth person killed in And Then There Were None?** Emily Brent is the fifth victim. She is a religious older lady who indirectly killed her young maid, Beatrice Taylor. When the young, unmarried girl became pregnant, the respectable and pious Emily fired her. Beatrice had nowhere to go, so she died by suicide.

**Who killed Mrs Rogers in And Then There Were None?** Mrs. Rogers dies in her sleep after suffering from a chloral overdose.

**What does Justice Wargrave look like?** Christie describes Wargrave as wizened and ugly, with a "frog-like face[,] . . . tortoise-like neck," and "pale shrewd little eyes"; his ugliness makes his appearance more forbidding.

**Why did Vera hang herself?** Vera is quite intelligent and generally keeps a positive attitude but is clearly haunted by guilt and becomes prone to hysteria. After killing the only remaining survivor, Philip Lombard, Vera commits suicide by hanging, imagining that Hugo is in the room with her and wants her to do so.

**What is chapter 10 about in *And Then There Were None*?** After searching the island, the remaining seven know they are alone and that one of them must be the murderer. In Chapter 10 of Agatha Christie's *And Then There Were None*, the survivors assess their situation and try to figure out how to stay alive long enough for the storm to pass so they can leave the island.

**What does Vera smell in her room?** Later, Vera gets up to take a shower. She enters her room and suddenly feels as if she were again at the seashore where Cyril drowned. She smells the salt of the sea, and the wind blows out her candle.

**Did Vera admit to killing Cyril?** She let Cyril drown so that his relative, Hugo, would inherit his money and then be rich enough to marry her. An inquest cleared her of any wrongdoing, but Hugo, certain that Vera had let Cyril die, would have nothing more to do with her. Throughout the novel, Vera's guilty memories of her crime plague her.

**Why did Vera think Armstrong wasn't dead?** Vera scolds them for being distracted. She points out the verse in the rhyme that applies to Armstrong's death: "A red herring swallowed one and then there were three." A "red herring" is a term for a false lead or a decoy, and she thinks that Armstrong is not really dead and that he has tricked them somehow.

**What crime did Vera commit?** In Vera's case, she was accused of murdering a young boy, that she was in charge of, by encouraging him to swim farther into the ocean than he could have, and allowing him to drown.

**Who is the real killer in *And Then There Were None*?** Given that Wargrave is actually the killer, this does not work well for Armstrong. In *And Then There Were None*, Armstrong's death is actually caused by Wargrave himself.

**What crime did Dr. Armstrong commit?** Armstrong reflects, vaguely, on an egregious mistake in his past. Readers later learn that he accidentally killed a woman while operating on her while drunk. He has tried to put the event behind him—he no longer drinks and his medical practice thrives—but he still thinks about what happened.

**Why is Dr. Armstrong suspicious?** After the first two deaths by poisoning, Armstrong comes under strong suspicion from the rest of the house guests. As a doctor, he has easy access to and knowledge of poisons.

**What suspicious object is Lombard carrying?** How did the murderer know that Lombard would have a revolver with him on the island? He had instructed Mr. Morris to tell Lombard to bring the weapon with him.

**What killed Mrs. Rogers?** Wargrave and Lombard were shot, the first through the head, the second through the heart. Miss Brent and Marston died of cyanide poisoning, Mrs. Rogers died of an overdose of chloral. Rogers' head was split open.

**Did Mrs. Rogers feel guilty?** She broke down completely and fainted. The shock of having her wickedness brought home to her was too much for her. Miss Brent explains that Mrs. Rogers's death overnight must have been caused by the woman's guilty conscience.

**Who is the most guilty in *And Then There Were None*?** Throughout the novel the most guilty characters were Vera Claythorne, Anthony Marston, and Doctor Armstrong.

**Who killed Mrs Rogers in *And Then There Were None*?** Mrs. Rogers dies in her sleep after suffering from a chloral overdose.

**Who dies in order in *And Then There Were None*?**

**What crime did Dr. Armstrong commit?** Armstrong reflects, vaguely, on an egregious mistake in his past. Readers later learn that he accidentally killed a woman while operating on her while drunk. He has tried to put the event behind him—he no longer drinks and his medical practice thrives—but he still thinks about what happened.

**Why did Vera hang herself?** Vera is quite intelligent and generally keeps a positive attitude but is clearly haunted by guilt and becomes prone to hysteria. After killing the only remaining survivor, Philip Lombard, Vera commits suicide by hanging, imagining that Hugo is in the room with her and wants her to do so.

**What does Justice Wargrave look like?** Christie describes Wargrave as wizened and ugly, with a “frog-like face[,] . . . tortoise-like neck,” and “pale shrewd little eyes”; his ugliness makes his appearance more forbidding.

**Who killed Anthony Marston?** The person who kills Anthony Marston is Lawrence Wargrave, the judge. He poisons Marston's drink with potassium cyanide.

**Who killed William Blore?** Toward the end of the book, the dishonest Blore is one of three people left alive, which include Vera Claythorne and Philip Lombard. After a hungry Blore heads back to the house by himself in search of something to eat, he dies after being hit in the head by a large marble clock.

**Who does Dr. Armstrong dream that he is killing?** Dr. Armstrong is dreaming about being back in the operating room where he is having a hard time keeping his nerve. He sees Emily Brent on the operating table and knows that he has to kill her. He asks where the ether is, but when he looks back at the body, it is Marston lying on the operating table, laughing at him.

**What suspicious object is Lombard carrying?** How did the murderer know that Lombard would have a revolver with him on the island? He had instructed Mr. Morris to tell Lombard to bring the weapon with him.

**Who killed Emily Brent?** She is killed with a poison injection. In the end, it is revealed that the killer is Judge Wargrave. He fakes his death on the island and continues to kill the other guests.

**Who is the real killer in And Then There Were None?** Given that Wargrave is actually the killer, this does not work well for Armstrong. In *And Then There Were None*, Armstrong's death is actually caused by Wargrave himself.

**Does anyone survive in And Then There Were None?** In the novel, all ten main characters die and only the police who arrive on the island after the events are left alive. However, in the play version that Christie herself wrote there is an alternate ending in which Phillip Lombard and Vera Claythorne both survive and are innocent of the crimes they are accused of.

**Why is Armstrong suspicious?** As a doctor, he has easy access to and knowledge of poisons. However, Armstrong convinces the other characters of his innocence and points suspicion at characters he views as less respectable, and therefore less trustworthy, such as the Rogerses.

**What item of Lombard's is missing?** Reluctantly, Lombard submits, but when they go to his bedside table to retrieve it, his revolver is missing.

**Did Dr Armstrong feel guilty?** Vera Claythorne and Dr. Armstrong both have their guilt effect their time on the island and even their death. Both of their guilt grows by watching others on the island die.
