3. Which companies are involved in exploration and production in the Sirte Basin Province?

Numerous international oil companies, including Total, BP, Shell, and ExxonMobil, are actively involved in exploration and production activities in the Sirte Basin Province. Total is the largest foreign operator in Libya and is responsible for managing the Zelten field.

4. What are the challenges facing exploration and production in the Sirte Basin Province?

Exploration and production in the Sirte Basin Province are not without challenges. The region's harsh desert environment poses logistical difficulties, and political instability in the country has also impacted operations. Despite the challenges, the Sirte Basin Province is believed to have significant undeveloped hydrocarbon potential. The basin is estimated to hold over 30 billion barrels of oil in place, making it an attractive target for continued exploration and production. However, the realization of this potential will depend on the resolution of political and environmental issues in the region.
