What is the service engine light on a Ford Focus? The check engine light, also known as the malfunction indicator lamp (MIL) or service engine soon light, indicates issues with your vehicle's emissions system. A loose gas cap is a common cause, but it could also indicate problems with the oxygen sensors, mass airflow sensor, catalytic converter and more.

How much oil does a 2008 Ford Focus take? Motor oil — SAE 5W-20 motor oil. (Note that factory fill is 5W-20 synthetic blend motor oil, but that synthetic blend is not required.) Capacity is 4.5 quarts (4.3 liters).

When should you change the timing belt on a 2009 Ford Focus? Although timing belts are critical, there's no need to replace them regularly –unless explicitly recommended in your Ford owner's manual. Some automakers recommend changing a timing belt between 60,000 and 100,000, others don't. Many of today's timing belts can go 100,000 miles or more without needing to be replaced.

How often should a Ford Focus timing belt be changed?

Can I use 5W-30 oil in my ford focus? 5W-30 and 5W-40 are compatible with many models of common cars, including the Ford Ka, Ford Focus (pictured below), VW Golf, Skoda Fabia and Honda Civic. However, some other common cars (such as certain MINI Cooper and Vauxhall Astra models) recommend 0W-30 oil.

Can 5w30 be used instead of 5w20? The 5W-20, however, will remain a little thinner once you reach operating temperature to help improve fuel economy and flow fast enough to fill the tight tolerances in the engine. Using 5W-30 instead can

reduce fuel economy and impede flow throughout the engine.

How much horsepower does a 1.6 L ford focus have?

Can I drive my Ford Focus with the engine light on? Is it safe to drive your Ford Focus with the check engine light on? This question is not very uncomplicated because it any depends on the severity of the issue. If the cause is a minor issue, such as a loose gas cap, it should be reliable to drive. This is generally indicated by a steady glow of the check engine light.

What is the most common check engine code?

How can I check my Ford engine code without a code reader? Method 1: The Check Engine Light Dance Turn Your Key: Put the key into the ignition and turn it to "Run" without starting your engine. How much does it cost to fill up a 2008 Ford Focus?

Are there any warning signs before a timing belt? If your engine has slow acceleration (it feels less powerful than it should, or used to be) when it reaches between 2,000 and 4000 RPM, is rattling, or is making an unusual sound when revving, it could be an indication that your timing belt is loose or breaking down from old age.

How long should a 2009 Ford Focus last? As with most vehicles, the Ford Focus can last a lifetime of around 200,000 miles. That being said, many owners have reported their Focus lasting 250,000 miles. If you drive an average of 15,000 miles each year, your Ford Focus can last around 13 to 16 years if maintained.

How can you tell if a timing belt needs replacing?

What happens if the timing belt breaks Ford Focus? A broken timing belt will stop your engine running and could even damage it. A faulty or leaking water pump could let your engine overheat, also causing your vehicle to break down.

Do I need to change the water pump with the timing belt? In most cars that use a timing belt, the timing belt drives the water pump. This means that, if the water pump goes bad and seizes, it snaps the timing belt, which destroys the engine. If the water pump is driven by the timing belt, the water pump should ALWAYS be replaced with the timing belt.

Which Ford engines have a wet belt replacement? The 1.0 litre EcoBoost engine has a wet timing belt instead of a traditional timing belt. Since 2012 this engine has been fitted to several Ford models including the Fiesta, Focus, Transit Connect Van and the B-Max.

What kind of oil goes in a 2009 Ford Focus?

What will happen if I put 5W-30 instead of 5w20? Using 5W-30 instead can reduce fuel economy and impede flow throughout the engine. While using it temporarily in a pinch likely won't cause your engine lasting harm, remember that the engineers who built your engine did so with a specific viscosity oil in mind, meaning it's best to stick with it.

Do Fords take synthetic oil? For example, you probably need full synthetic motor oil if you tow an RV or car with your Ford Super-Duty or frequently drive with your Ford Explorer on dirt roads. This type of motor oil is more expensive than conventional oil due to the additional processing.

When to change timing belt on Ford Focus 1.6 petrol? The 1.6 Zetec sturdy cambelt drives nothing but cams and a tensioner pulley and was designed to last the life of the engine. Ford advise 10yrs/100,000m change interval as a precautionary.

Shopping around to get a few quotes is your best bet to get the best deal, but you can expect to pay anywhere from \$409 to \$919 (including parts and labor).

When should I replace my petrol timing belt? Cambelts or timing belts usually need to be replaced, usually between 40,000 and 100,000 miles. Alternatively, for lower mileage cars, the belt is advised to be replaced around four or five years. However, it all depends on the car and manufacturer.

Does a 2008 Ford Focus 1.6 petrol have a timing belt or chain? If its a petrol version it has a timing chain. For diesel version it has a belt. If you still have confusion a servicable timing belt has easy access bolts on cover so mechanic can open and observe them.

How do you know if your timing belt needs changed? If you hear a ticking noise under the hood, there's a good chance that your timing belt needs to be replaced. The belt is attached to your engine's crankshaft with a series of pulleys. When the belt is worn out, it will not be able to turn the crankshaft as effectively. This is what causes the ticking noise.

How can I extend the life of my timing belt?

Can a timing belt last 20 years? Seven years is the maximum life of the timing belt recommended by most manufacturers. For example, the belt should be replaced even if the engine has only 30,000 miles but is seven years of age. More timing belts break due to age than mileage.

Is 2009 a good year for Ford Focus? Edmunds says. The 2009 Ford Focus is a good value, but those in the market for a refined compact sedan or performance-oriented coupe should look elsewhere.

What is the longevity of a 2009 Ford Focus? FORD FOCUS LIFETIME MILEAGE EXPECTATIONS As with most vehicles, the Ford Focus can last a lifetime of around 200,000 miles.
