Drinking water treatment plants such as the Washington Aqueduct add orthophosphate, a corrosion control treatment, before water leaves the treatment plant.

What are the four basic methods for corrosion control and corrosion protection?

What is a corrosion control program? A Corrosion Prevention and Control Program should be established to maintain the aircraft's aircraft structure's resistance to corrosion as a result of systematic (e.g. age related) deterioration through chemical and/or environmental interaction.

What is required by 14 CFR Part 43? Part 43 sets the standards for aircraft maintenance to ensure safety and efficiency and includes preventative care, general maintenance, rebuilding, and alteration of an airplane.
