World Poverty: The Roots of Global Inequality and the Modern World System

Q: What are the key factors contributing to global inequality? **A:** The modern world system, established through colonialism and imperialism, has created vast disparities between developed and developing countries. Structural factors such as unequal distribution of resources, economic exploitation, and political dominance perpetuate power imbalances.

Q: How does the global economic system exacerbate poverty? **A:** The current neoliberal economic policies, characterized by free trade, deregulation, and privatization, prioritize profit and growth over social welfare. This leads to widening income gaps, reduced access to education and healthcare, and increased vulnerability to economic shocks.

Q: What is the role of historical and social factors in poverty? **A:** Poverty is often perpetuated by historical injustices, such as slavery, colonialism, and discrimination. Social structures, including gender inequality, caste systems, and lack of access to basic services, further entrench poverty.

Q: What are the consequences of world poverty? **A:** Poverty has devastating impacts on individuals and societies. It leads to hunger, disease, lack of education, and social marginalization. It also undermines economic growth and stability,

creating a vicious cycle of poverty and inequality.

Q: What solutions can address world poverty? **A:** Addressing world poverty requires a multifaceted approach. This includes promoting sustainable economic growth, investing in education and healthcare, reducing income inequality, and empowering marginalized communities. It also necessitates a fundamental shift in global economic and political structures to dismantle the root causes of inequality.
