

# Ap world history chapter 27 new imperialism study guide answers

## Download Complete File

**What was the major cash crop from Southeast Asia and Indonesia that Europeans used for their own benefit?** The arrival of Europeans and the spice and cash-crop trade The nutmeg plant is native to Indonesia's Banda Islands. Once one of the world's most valuable commodities, it drew the first European colonial powers to Indonesia. The Portuguese were the first Europeans to reach the Indonesian archipelago.

**What was the new imperialism in the AP world?** Many Pacific Islands were occupied by the United States, Japan, Germany, France, and Britain. Korea was subjugated (conquered) by Japan. This rapid expansion of colonization around 1880 is often called "New Imperialism".

**Where was the most successful African resistance against Europeans?** When Italy began to turn the sights of their imperial ambitions toward Ethiopia, the Ethiopian military became the only African kingdom able to successfully resist the military might of European colonial power, using Russian-supplied weapons to defeat the Italian invading force at the Battle of Adwa in 1896.

**What is the system of administering and exploiting the colonies for the benefit of the home country?** Colonialism is defined as "control by one power over a dependent area or people." It occurs when one nation subjugates another, conquering its population and exploiting it, often while forcing its own language and cultural values upon its people.

**What are the 3 most important crops that went from the Americas to Europe Asia and Africa?** The Columbian Exchange was more evenhanded when it came to

crops. The Americas' farmers' gifts to other continents included staples such as corn (maize), potatoes, cassava, and sweet potatoes, together with secondary food crops such as tomatoes, peanuts, pumpkins, squashes, pineapples, and chili peppers.

**What crops did Europeans import to the New World to be grown as cash crops?** Europeans brought plants from Asia, such as sugar and coffee, to grow as cash crops in the Americas. They also turned American plants, like tobacco and cacao, into cash crops. European colonists learned that the best way to make a profit was to farm huge numbers of the same species of plant, also called monoculture.

**What are the 5 main causes of New Imperialism?**

**Who benefited from the New Imperialism?** Some historians point out that the new imperialism featured benefits for the native populations, such as infrastructural development, education, and modern medicine in the colonies. However, by and large, these benefits came at a price of grossly unequal social and political relations.

**What ended New Imperialism?** In many ways, this new form of imperialism formed a part of the British identity until the end of the era of new imperialism with the Second World War.

**How did colonized people resist European imperialism?** Resistance took many forms. Beyond the violent/non-violent binary, resistance was expressed through demands for equality and freedom, religious opposition, economic and labor organization, mass protest, and war. Colonial rule led to resistance and, ultimately, to independence.

**Which was the only African nation that successfully resisted the Europeans?** Through this victory, King Menilik II demanded the abolition of the Treaty of Wichale and recognition of Ethiopia as a sovereign nation by Italy and other European powers. Ethiopia became the only African nation to successfully resist the partition of Africa.

**What was Asia's response to European imperialism?** Asian communities responded to imperialism through many different means. Some, like the Ottoman Empire, adopted reforms that sought to emulate Western models of military

organization and education. Others, like Japan, emulated the nation-state form itself.

**What was the first crop to be mass marketed to consumers in Europe?** Sugar was the first crop to be mass marketed to European consumers, primarily sourced from European colonies. The in-demand commodity was made available in large quantities due to the conversion of these colonies into sugar plantations.

**Who benefited the most from the domestic system?** The person who benefited most from the Domestic System was the merchants because they only had to pay lower wage costs to the rural workers and there was an increased efficiency due to a more extensive division of labor. What are the differences between the Domestic System and the Factory System?

**Why did southern economies rely on indentured servitude and slavery?** Why did southern economies rely on indentured servitude and slavery? Growing tobacco and rice required a great deal of labor.

**What killed the most indigenous people in the Americas who died during the Columbian Exchange?** When the Europeans arrived, carrying germs which thrived in dense, semi-urban populations, the indigenous people of the Americas were effectively doomed. They had never experienced smallpox, measles or flu before, and the viruses tore through the continent, killing an estimated 90% of Native Americans.

**Who benefited most from the Columbian Exchange Americas, Europe, Africa, or Asia?** Answer and Explanation: Europeans benefited the most from the Columbian Exchange. During this time, the gold and silver of the Americas was shipped to the coffers of European treasuries, and food items from Africa and the Americas increased the life expectancy of people in Europe.

**What is the only epidemic disease that traveled from the Americas back to the Old World as a result of the early Columbian Exchange?** There are very few examples of disease being spread from the New World to the Old. 2 The most notable exception, and by far the most controversial, is venereal syphilis.

**Who was affected the most by the Columbian Exchange?** The ones most affected by the exchange were the indigenous peoples of the Americas. They were

exposed to new diseases like smallpox and measles from Europe for which they had no immunity, leading to catastrophic deaths. A surprising aspect of the Columbian Exchange was the significant ecological transformation.

**What are some interesting facts about the Columbian Exchange?** Crops introduced to New World include rice, wheat, apples, bananas, and coffee. Before the Columbian Exchange there was no coffee in Columbia, no chocolate in Switzerland, and no pineapples in Hawaii. Old World animals expanded the food supply in the New World.

**What disease did the conquistadors bring with them?** Contrary to popular belief, it was not the European guns or fierce soldiers that conquered the native Americans, but instead it was the common childhood illnesses brought from the Old World by the European conquistadors. Diseases such as smallpox, measles, and typhus annihilated most of the American native populations.

**What were the cash crops grown in the European colonies?** Sugar cane, tobacco, cotton, tea, rice and coffee were some of the main products grown in the colonies, which paradoxically had to begin importing food since cash crops generally took a majority of the available farmland, sometimes up to 80%. Sugar cane required a heavy input of labour (originally slaves).

**What resources did Southeast Asia provide to Europe?** A wide range of commodities originated in the region, but especially important were such spices as pepper, ginger, cloves, and nutmeg. The spice trade initially was developed by Indian and Arab merchants, but it also brought Europeans to the region.

**What were the cash crops in Asia during imperialism?** The lands of Southeast Asia were perfect for plantation agriculture. As these products, such as coffee, bananas, and sugar cane, became more important, Europeans raced to claim the lands.

**What are the four cash crops of South and Southeast Asia?** Asia is noted for several plantation cash crops, of which the most important are tea, rubber, palm oil, coconuts, and sugarcane.
