Think Big: Unleashing Your Potential

In the realm of self-improvement, the concept of "thinking big" holds immense power. As renowned author and strength coach Ben Pollack emphasizes in his article on EliteFTS.com, expanding your thinking can unlock extraordinary possibilities.

What does "thinking big" mean?

Thinking big is not about setting unrealistic goals or chasing unattainable dreams. Rather, it involves envisioning your aspirations on a grander scale and believing that you have the capacity to achieve them. It's about embracing a mindset of limitless potential and challenging the constraints imposed by self-doubt.

Why is thinking big important?

When you think big, you set higher standards for yourself. This, in turn, fuels your motivation, drives your perseverance, and inspires you to take bolder actions towards your goals. It also allows you to recognize opportunities that you might otherwise overlook and expand your understanding of what is possible.

How can I practice thinking big?

To cultivate a mindset of thinking big, start by identifying your core values and aspirations. What do you truly want out of life? What makes you passionate and excited? Once you have clarity on these, visualize yourself achieving those goals in a vivid and detailed manner. Surround yourself with positive influences that support your big thinking and challenge any negative or limiting beliefs that may hold you back.

What are the benefits of thinking big?

Thinking big can lead to a myriad of benefits, including:

- Increased confidence and self-esteem
- Heightened creativity and innovation

- Greater enthusiasm and energy
- Enhanced problem-solving abilities
- Unlocking new opportunities for growth and success

Remember:

Thinking big is not a passive endeavor. It requires consistent effort, a willingness to embrace challenges, and a belief in your own abilities. By adopting a mindset of limitless potential, you open yourself up to a world of possibilities and set the stage for achieving your dreams on a grand scale.

Does GMAT penalize for unanswered questions? There is a penalty for not completing each section of the exam. If you do not finish in the allotted time, your score will be penalized reflecting the number of questions unanswered. Your GMAT exam score will be the best reflection of your performance when all questions are managed to be answered within the time limit.

What is the Islamic perspective on environmental sustainability? The Qur'an invites Muslims to assume the sacred responsibility of living in a balanced world of environmental conservation, respect for others (regardless of differing beliefs/views), living sustainably, and protecting our mental health.

What impact has the Islamic religion had on art and architecture? Islamic religious art differs from Christian religious art in that it is non-figural because many Muslims believe that the depiction of the human form is idolatry, and thereby a sin against God, forbidden in the Qur'an. Calligraphy and architectural elements are given important religious significance in Islamic art.

What is the historical background of Islamic art and architecture? Islamic art developed from many sources: Roman, early Christian art, and Byzantine styles; Sassanian art of pre-Islamic Persia; Central Asian styles brought by various nomadic incursions, and Chinese influences appear on Islamic painting, pottery, and textiles.

What were some of the contributions that Muslims made to the arts and architecture? During the Abbasid Period (circa 750 - 1258 CE), Islamic artists moved toward unique imagery and developed a complex form known as the arabesque. It interwove spirals, foliate, and geometric figures. An important type of building in Islamic architecture is the mosque, or house of prayer.

What does sustainability mean in Islam? Islam teaches us the responsible use of resources as these resources are a valuable gift from Allah for both present and upcoming generations. The Islamic concept of “Sustainability” bears the holistic meaning of empathy and charity (compulsory and optional both) for others.

What are the values of Islamic sustainability? The Quran prohibits usury and encourages charity and helping those in need. Islam also encourages sustainable economic practices, such as avoiding excessive consumption and wastefulness. The Islamic perspective on sustainability emphasizes the importance of responsible stewardship of the earth and its resources.

What is unique about Islamic art and architecture? Over time, Islamic art developed a unique artistic language whose hallmarks included all-over decoration and the use of vegetal and geometric patterns, such as the Arabesque, among other forms. As writing is highly valued in Islam, calligraphy is ubiquitous, serving as decoration for objects and buildings.

How does Islam contribute to the arts? Typically, though not entirely, Islamic art has focused on the depiction of patterns and Arabic calligraphy, rather than human or animal figures, because it is believed by many Muslims that the depiction of the human form is idolatry and thereby a sin against God that is forbidden in the Qur'an.

What are the three types of Islamic art? The four basic components of Islamic ornament are calligraphy, vegetal patterns, geometric patterns, and figural representation.

What is the Islamic architecture culture? The best-known examples of Islamic architecture are mosques and madrasahs (religious schools), but there are many famous tombs, palaces, fortresses, and government buildings as well. Private villas also illustrate common style elements such as the courtyard, arches, and geometric tile work.

What is the most interesting or surprising thing you learned about Islamic art? Islamic art is not a single, monolithic style, but rather a collection of diverse artistic traditions from different regions and time periods. This means that there is a wide range of styles and forms within Islamic art, and no two pieces are exactly the same.

What was early Islamic architecture most influenced by? Early Islamic architecture was influenced by Roman, Byzantine, Iranian, and Mesopotamian architecture and all other lands which the early Muslim conquests conquered in the seventh and eighth centuries.

What contributions has Islam made to culture and society? Muslims made major advancements in astronomy, zoology, geography, arithmetic, navigation, art, architecture, and technology.

How did Muslims contribute to city building and architecture? With its towering minarets, horseshoe and pointed arches, muqarnas vaulting, and ornamental details, Islamic architecture brought unique contributions to the history of architecture. Following the examples of the Dome of the Rock, Taj Mahal, and Alhambra, its tradition continues today.

What is the most famous Islamic architecture? Today the Taj Mahal is the most famous piece of Islamic architecture in the world, with the possible exception of the Dome of the Rock in Jerusalem.

What does Islam teach us about the environment? According to the teachings of Islam, the essential elements of nature—earth, water, fire, forests, and light—belong to all living things and not only to the human race. Islam has emphasized the importance of preserving the environment and protecting natural resources.

What are the goals of Islam and sustainable development? Islam teaches human beings rights and duties derived from sources of Islamic law. Human beings

are required to have knowledge and capacity to acquire right and execute duty. SDGs include reduction of inequality by economic inclusion of all without discrimination as to sex, race, and place of birth.

What is the perspective of environmental sustainability? Environmental sustainability is the ability to maintain the qualities that are valued in the physical environment. Threats to these aspects of the environment mean that there is a risk that these things will not be maintained.

What is sustainability in Islam? It is the duty of all Muslims to respect, nurture and care for the environment. Corruption of all kinds, including environmental corruption, which includes industrial pollution, environmental damage, and reckless exploitation and mismanagement of natural resources are disliked by Allah (Subhanahu Wa Ta'ala).

How you can practice sustainability by using Islamic principle? Practices such as water conservation, moderation in consumption, and the prohibition of wastefulness (Israf) align with principles of sustainability. Prophetic traditions encourage planting trees, conserving water, and respecting animals, instilling a deep sense of responsibility towards the environment.

What does Islam call for the sustainability of natural resources? Khalifa (Stewardship): Muslims believe that humans are appointed as stewards of the Earth. This concept emphasizes the duty to care for and sustainably manage natural resources, ensuring their preservation for future generations.

What does Islamic religion say about environmental care? According to the teachings of Islam, the essential elements of nature—earth, water, fire, forests, and light—belong to all living things and not only to the human race. Islam has emphasized the importance of preserving the environment and protecting natural resources.

What is environmental ethics toward an Islamic perspective? Human action is ethically right when she/he does her/his duty just according to God's commands. Behave toward nature based on divine command is a clear case in Islam in which humans are asked to regard the environment. Hence human behavior toward the natural environment can be evaluated based on such commands.

What does Islam call for the sustainability of natural resources? Khalifa (Stewardship): Muslims believe that humans are appointed as stewards of the Earth. This concept emphasizes the duty to care for and sustainably manage natural resources, ensuring their preservation for future generations.

What does the Quran say about protecting the environment? The Holy Qur'an sets out complete spiritual and moral guidelines for man. He is told to walk humbly (Luqm?n, 31:19); not to be wasteful or extravagant; not to disrupt the balance that exists in nature and not to change the creation of God.
