### **Totem Pole PFC with GaN and SiC Power Electronics**

**Question:** What is a totem pole power factor correction (PFC) converter?

**Answer:** A totem pole PFC converter is a type of PFC converter that uses two switches (one GaN and one SiC) in a totem pole configuration to achieve high efficiency and low electromagnetic interference (EMI). The GaN switch is typically used on the high-side of the totem pole, while the SiC switch is used on the low-side.

**Question:** What are the advantages of using GaN and SiC power electronics in totem pole PFC converters?

**Answer:** GaN and SiC power electronics offer a number of advantages for totem pole PFC converters, including:

- **High efficiency:** GaN and SiC devices have very low on-state resistance, which results in lower conduction losses. Additionally, GaN and SiC devices have low switching losses due to their fast switching speeds.
- **Low EMI:** GaN and SiC devices have low switching noise, which results in reduced EMI. This is important for applications where EMI is a concern, such as in medical devices and automotive electronics.
- **Compact size:** GaN and SiC devices are small and compact, which allows for smaller and lighter PFC converters.

**Question:** What are the challenges of using GaN and SiC power electronics in totem pole PFC converters?

**Answer:** There are a few challenges associated with using GaN and SiC power electronics in totem pole PFC converters, including:

- High cost: GaN and SiC devices are typically more expensive than traditional silicon devices.
- Reliability: GaN and SiC devices are still relatively new technologies, and their long-term reliability is not yet fully known.
- Gate drive requirements: GaN and SiC devices require special gate drive circuits that can provide the necessary high voltage and current.

**Question:** What are the applications of totem pole PFC converters with GaN and SiC power electronics?

**Answer:** Totem pole PFC converters with GaN and SiC power electronics are suitable for a wide range of applications, including:

- Data centers
- Telecommunications
- Industrial power supplies
- Automotive electronics
