**What is the problem with the 1999 Daewoo Lanos?** The 1999 Daewoo Lanos is a cheap inner city run around but that's about as good as it gets. It struggles to make it up even the slightest incline and sometimes struggles off the mark. There is a common problem with the heater core and the hoses needed to be re-routed to prevent it from leaking into the car.

**What happened to Daewoo Lanos?** The Lanos was finally phased out after the 2002 model year, superseded worldwide by the Daewoo Kalos. Daewoo ceased operations in North America. After GM took over Daewoo to become GMDAT, Chevrolet began importing the Daewoo Kalos, rebadged as the Aveo, to North America beginning with MY 2004.

**Where is the PCV valve on a Daewoo Lanos?** The valve is situated near or in the top of the Daewoo Lanos's rocker cover (valve cover). The PCV valve can get stuck open or clogged with sludge and should be inspected regularly and replaced when required.

**What went wrong with Daewoo?** Crisis and collapse Daewoo Group ran into deep financial trouble in 1998 due to the 1997 Asian financial crisis, increasingly precarious relationships with the Korean government under President Kim Dae-jung, and its own poor financial management.

**What is the fuel economy of a Daewoo Lanos?** The Daewoo Lanos currently offers fuel consumption from 7.1 to 7.8L/100km.

**Is Daewoo still operating?** Are Daewoo cars still made? No. The Daewoo name was phased out in South Korea in 2011 (earlier in other global markets) after General Motors rebranded its operations "GM Korea." Today, Daewoo's former

factories build Chevrolet and Buick models made for domestic sales and export. Why did Daewoo go out of business?

**Can you still buy a Daewoo car?** Daewoo-branded cars were only available in the U.S. and Canada between 1997-2002. The brand went bankrupt in the early 2000s and was absorbed by General Motors to become GM Korea, which still kept the Daewoo name alive in some parts of the world.

**Why did Daewoo stop making cars?** By 1999, the whole Daewoo Group ran into financial trouble, and was forced to sell its automotive division. Candidates for the operation included Hyundai associated with DaimlerChrysler, Ford Motor Company and the GM-Fiat alliance.

The last year for Daewoo's trio of U.S. models was 2002. The Daewoo name was retired in South Korea in 2011.

**How many Darth Plagueis books are there?** While Darth Plagueis only physically appears in two books in the Expanded Universe -- Darth Plagueis and Darth Maul: Lockdown -- there have been plenty of other stories that take place during the events of Plagueis's rise to power.

**Is Plagueis' book canon?** It is very unfortunate that the story is part of Legends instead of canon, however, a lot of it has indeed made it back into canon thanks to people like the original author [starwars.wikia.com/wiki/James\\_Luceno](http://starwars.wikia.com/wiki/James_Luceno) .

**What is Darth Plagueis's real name?** The novel covers the later life and machinations of Darth Plagueis (born Hego Damask II), over a roughly fifty-year period pre-dating and culminating concurrently with the climax of *The Phantom Menace*.

**When was Darth Plagueis written?** The character was created by George Lucas as early as the first draft of *Revenge of the Sith*—dated April 2003—and possibly earlier. His story was massively expanded upon in the 2012 *Star Wars Legends* novel *Darth Plagueis*, written by James Luceno.

**Did Plagueis create Anakin?** In an early *Revenge of the Sith* draft, Palpatine confirmed that Darth Plagueis used the Midi-chlorians to start the cell division that created Anakin Skywalker.

**Is Plagueis more powerful than Palpatine?** These factors combined seemingly indicate that *Star Wars'* Darth Plagueis was more powerful than Palpatine, although the latter's ability to manipulate others gave him a significant edge over his Sith Master.

**Did Sidious lie about Plagueis?** Palpatine later revealed that he was the unnamed apprentice, and that Plagueis' ability had been real. This was one of the steps towards turning Skywalker to the dark side of the Force.

**Is Darth Plagueis snoke?** Many think it was Snoke. Even in the time of the Empire, the pinnacle of the Sith climb to power, Snoke had influence. Snoke is not a Muun so he's not Darth Plagueis.

**Is Darth Plagueis Anakin's father?** No. Here is what happened: Plagueis was messing around with the Force and the midichlorians, trying to create a perfect servant of the Dark Side. Well, the Force didn't like that, so the Force created Anakin in response, to one day get revenge on the Sith for trying to mess with the Force.
