### APA Referencing in the Digital Age\*\*

The American Psychological Association (APA) style is a widely used referencing system in academic writing. With the introduction of the 7th edition in 2020, questions arise about similarities, differences, and correct usage of the latest and previous versions.

### Is APA 6th Edition Still Used?

No, APA 6th edition is superseded by APA 7th edition. However, some institutions and journals may still accept references in the 6th edition format.

### Key Differences Between APA 6th and 7th Edition

- **Parenthetical Citations:**

- APA 6th: Author's last name and year of publication in parentheses within the text.
- APA 7th: Author's last name, year of publication, and page number(s) in parentheses within the text.

- **Reference List:**

- APA 6th: Double-spaced, with a hanging indent for all lines except the first.
- APA 7th: Single-spaced, with a hanging indent for all lines except the first.

- **Italics:**

- APA 6th: Italicizes book and journal titles.
- APA 7th: Italicizes only journal article titles.

- **Digital Object Identifier (DOI):**

- APA 7th: Includes DOIs in reference list entries.

## How to Reference in APA 6th Edition

**Website:**

- Author's Last Name, First Initial. (Year, Month Day). Website Title. Website URL. DOI (if available).

**Remember:**

- Always check with your instructor or institution for specific referencing requirements.
- Use the APA Style Manual or online resources for more detailed guidance.
- Consistency and accuracy are crucial in academic referencing.

**The Four Causes of Structural Unemployment: Keeping People from the Jobs They Deserve**

Structural unemployment is a type of unemployment that occurs when there is a mismatch between the skills and qualifications of available workers and the demands of the labor market. This can happen for a variety of reasons, but the four most common factors are technological advancements, globalization, changes in consumer demand, and demographic shifts.

**1. Technological Advancements**

As technology advances, it often leads to job displacement. For example, the rise of automation has eliminated many manufacturing jobs that used to be performed by humans. Workers who are displaced by technology often have difficulty finding new jobs because they do not have the necessary skills or qualifications.

**2. Globalization**

Globalization has also contributed to structural unemployment. As companies move their operations to other countries where labor costs are lower, it can lead to job losses in the United States. Workers who lose their jobs to globalization often have difficulty finding new jobs that offer comparable wages and benefits.

### **3. Changes in Consumer Demand**

Changes in consumer demand can also lead to structural unemployment. For example, the decline in demand for certain types of goods and services can lead to job losses in the industries that produce those goods and services. Workers who lose their jobs due to changes in consumer demand often have difficulty finding new jobs in other industries.

### **4. Demographic Shifts**

Demographic shifts, such as the aging of the population, can also contribute to structural unemployment. As the population ages, there is a decrease in the number of people entering the workforce. This can lead to a shortage of workers in certain occupations, which can drive up wages and make it difficult for younger workers to find jobs.

### **Addressing Structural Unemployment**

Addressing structural unemployment requires a multi-faceted approach. One important step is to invest in education and training programs that help workers develop the skills and qualifications they need to compete in the global economy. Additionally, governments can provide support to workers who are displaced by technology or globalization by offering unemployment benefits and job retraining programs. Finally, it is important to address demographic shifts by encouraging people to stay in the workforce longer and by attracting new workers to the United States.

By taking these steps, we can help to ensure that everyone has the opportunity to find a good job that meets their needs.
