What is the exit voice loyalty theory? The exit, voice, loyalty model can be used to explain relationships between nation states and their citizens. The model predicts that when citizens have a credible exit threat and states are dependent on their citizens, states are less likely to take actions that the citizens would object to.

What is the exit voice loyalty neglect model? The Exit, Voice, Loyalty (EVL) model or Exit, Voice, Loyalty, Neglect (EVLN) is used in the fields of comparative politics and organizational behavior. It is an extensive form game used to model interactions typically involving negative changes to one player's environment by another player.

What is the exit and voice mechanism? Exit and voice are alternative responses to an unsatisfactory relationship: exit is the withdrawal from it, voice is the attempt to improve it through communication. They are not mutually exclusive responses: thus, the market is the archetypal exit mechanism, yet it usually involves voice.

What do economists mean when they speak of the tradeoff between voice and exit? Using Hirschman's (1970) terminology, we can describe stakeholders' choices as exit versus voice. Investors or consumers can exercise their exit option by divesting from polluting companies or boycotting their products; alternatively, investors can use their voice by voting or engaging with management.
