## [Download Complete File](#)

**What does FMSI stand for in brakes?** The Friction Materials Standards Institute (FMSI) has just updated its industry-standard part numbering system to include a total of 97 Z-Numbers. These numbers indicate brake pads specified by OEMs to use mechanical fusion, denoted by a 'Z' designation.

**How do I find my brake pad code?** Just about every brake pad or shoe you install has a cryptic code printed on the side of the friction material or on the backing plate.

**What is the difference between 4707 and 4515?** 4515 style brake shoes have a hump on the web (the web is the center rails that hold the roller pins and hardware), but 4707 style brake shoes DO NOT have a hump on the web (BE ADVISED THIS IS NOT ALWAYS THE CASE, USE THE OTHER FOLLOWING METHODS TO VERIFY)

**Can you mix and match brake pad brands?** There can be subtle differences between the braking components produced by different brands, and if these are 'mixed and matched' it may lead to reduced braking performance, reliability and longevity issues compared to installing system components from a single manufacturer.

**Is Brembo brake pads better than OEM?** Brembo is an established brand in the brake industry that has been around for almost 60 years. It specializes in performance brake parts, including brake pads. Many car owners consider Brembo to be an unbeatable brand. Brembo brake pads not only outperform other aftermarket brake pads, but they also outperform OE pads.

**Is it better to buy OEM brake pads?** Genuine OEM parts typically offer better reliability, warranties and fitment than aftermarket parts. On the other hand, you have more variety with aftermarket or third-party auto parts, and they may even perform better than OEM components when towing large loads or racing.

**How do I identify my brake pads?** On many vehicles, you can see the brake pad through the holes in the wheel. To check the life of the brake pad, you need to determine its thickness. You might need a flashlight to get a good look at the brake pad. If the pads look thin, less than 1/4", it might be time to get them replaced.

**What are good brake pad numbers?** A new brake pad will be around 12mm thick or 1/2 inch, and pads with sensors typically start to warn you when they get to 3mm or 1/8 inch, with a squeal or a warning light on the dash.

**How can you tell if brake pads are fake?**

**Can I replace 4515 with 4707?** As long as the 16.5" brake assembly has a "Q Plus" type High Rise camshaft, you can use either the Q or "Q Plus" brake shoe. Important Note: Where your core account is concerned, 4515 (Q) and 4707 (Q Plus) brake shoes are not interchangeable. You CANNOT return 4515 cores against 4707 purchases (and vice versa.)

**What size are 4515 brake shoes?**

**What are QE brake pads?** NAPA QUALITY ENGINEERED REPLACEMENT BRAKE PADS QE Brake™ disc brake pads are designed for top applications and offer the same features and benefits as many of the competitive "premium" brands. Its coverage, performance, and affordability make QE Brake™ is a great choice for customers.

**Can I use two different brand brake pads?** If you're replacing OE equipment with something comparable, there's no reason you can't switch from one brand to another. And there's no reason you can't buy pads from one company and rotors from another.

**Can you install brake pads wrong?** To ensure optimal performance, brake pads should be installed in the correct orientation. If the pads are installed backwards, it

can cause problems like uneven pad wear and damaged rotors, as well as performance issues like a soft or hard pedal due to the caliper piston not making proper contact.

**Do all 4 brake pads need to be the same?** There's no guarantee that the friction material consistency will be the same as the old pads, and it can cause problems with braking performance if they're not applying the same friction. And to ensure both wheels on the same axle are applying even pressure, change your car's brakes on each axle, left and right side.

**Is Wilwood better than Brembo?** While Wilwood brakes are not budget brakes, they will be more affordable, which opens up their use to a wider swath of customers. However, Brembo could be well worth the extra money if you are looking for brakes that will turn heads from the crowd at a car or truck show.

**Are Brembo brakes made in China?** ?The Brembo Group inaugurated its new production hub today for the manufacturing of aluminium brake calipers in Nanjing, located in China's Jiangsu province. President Alberto Bombassei was there to welcome the main Italian and Chinese authorities who were present.

**Why are Brembo brakes so expensive?**

**How to know if brake pads are OEM?** A: OEM stands for "original equipment manufacturer," so OEM brake pads are the same as those that came with the vehicle. The friction material on the brake pads may be organic, semi-metallic or ceramic.

**Which company brake pads are best?**

**Are cheap brake pads OK?** The longer it takes your vehicle to fully stop, the higher risk you run of a serious car accident. In addition, tests have shown that cheap brake pads are more unpredictable in their performance than high-quality ones. This means that on any given day, you won't be able to rely on your vehicle stopping safely.

**What is the full form of FMSi?** Fleet Management Systems International (FMSi)

**Are EBC brakes better than OEM?** This line of brake pads is proven to perform better than OE pads. To be more specific, EBC Greenstuff brake pads: Give your car 15% more stopping power than OE pads. Can handle repeated heavy braking without brake “fall-off”

**What does OEM brake pads mean?** What are OEM brake pads? The acronym OEM stands for Original Equipment Manufacturer, and it refers to parts that are made by your car's manufacturer and are precisely the same as the ones it was equipped with off the factory assembly line.

**Where is EBC brakes from?** EBC produces 100% of its brake pad range in its own factories in the UK and USA, 100% of its own motorcycle brake discs/rotors in its UK facility and a huge proportion of its automotive brake discs are also UK and USA made.
