

# Application form apsc

## Download Complete File

**What is the long form of apsc?** The Assam Public Service Commission came into existence on 1st April, 1937 in accordance with the provision of the Govt.

**What does APS-C stand for?** Advanced Photo System type-C (APS-C) is an image sensor format approximately equivalent in size to the Advanced Photo System film negative in its C ("Classic") format, of 25.1×16.7 mm, an aspect ratio of 3:2 and Ø 30.15 mm field diameter.

**What is the purpose of the APS-C?** We work to be a valued, credible and trusted partner to the Australian Public Service – promoting high standards of accountability, effectiveness and performance of the APS now and into the future.

**What is APS-C vs full form?** The main difference between APS-C and full-frame is the physical size of the image sensor – full-frame sensors are larger than APS-C sensors – and other differences between the two types of cameras flow from that.

**What is APS-C equivalent to?** Simply multiply your aperture, just as you would your focal length, by your crop factor to find the equivalent full frame aperture. So, a 35mm f/1.8 on APS-C is roughly equivalent to a 50mm f/2.8 on a full-frame camera.

**What is the highest rank in APS-C?** Assam Public Service Commission (APSC) The top ranked posts of APSC are Assam Civil Service (ACS)- Class 1 Magistrate and Assam Police Service (APS).

**What size is APS-C?** A full-frame sensor is 36mm by 24mm in size based on the traditional 35mm film format. An APS-C sensor is 1.5 times smaller, 25.1mm by 16.7mm, and named after the Advanced Photo System type-C film format, hence its abbreviation.
