Transformed Temperament: A Q&A with Tim LaHaye

Q: What is transformed temperament all about?

A: According to Pastor Tim LaHaye, transformed temperament is a radical change in one's nature, brought about by the Holy Spirit. It involves the tempering of our inherent sinful desires and the development of Christ-like qualities. This transformation is not merely a superficial change in behavior but a fundamental alteration at the core of our being.

Q: How does it differ from natural temperament?

A: Natural temperament refers to our inherited personality traits and tendencies. These traits can be either positive or negative, but they are not necessarily sinful. However, when these traits are not controlled by the Holy Spirit, they can lead us into temptation and conflict. Transformed temperament, on the other hand, involves the Holy Spirit working within us to bring our natural tendencies into alignment with the mind of Christ.

Q: What are the benefits of transformed temperament?

A: Transformed temperament brings about a range of benefits, including improved relationships, increased peace and joy, and a greater ability to resist temptation. It also enhances our spiritual growth and allows us to more effectively serve God and others.

Q: How can we achieve transformed temperament?

A: Achieving transformed temperament is a process that requires ongoing work and dedication. It involves daily reading of the Bible, prayer, and submission to the Holy Spirit. It also involves overcoming sin and developing Christ-like virtues. This process can be challenging, but it is essential for our spiritual well-being and our

ability to live Christ-centered lives.

Q: Can anyone experience transformed temperament?

A: Yes, transformed temperament is available to all who believe in Jesus Christ and are indwelt by the Holy Spirit. It is not a special gift reserved for a select few. However, it requires our willingness to surrender our lives to God and to follow His ways.

Why did Kodak fail the case study? A key factor behind the failure of Kodak was its seeming inability to innovate in the era of digital photography. While Kodak was a pioneer in photography in the 20th century, the company struggled to adapt to the changing market in the digital age.

What is the major lesson you can take away from this case study the Kodak case? Complacency and Over-Reliance on Legacy Business Models Kodak was heavily invested in the film-based photography market. The company's complacency in sticking to its legacy business model, despite the seismic changes in technology, was its first major mistake.

What went wrong at Kodak from the change management perspective? Ultimately, Kodak's failure was a result of its inability to adapt to changing market conditions. The company was focused on protecting its existing business, rather than embracing new technologies and opportunities. As a result, Kodak was left behind as the photography industry shifted towards digital.

What was Kodak's business strategy? Film Sales Model: Kodak's business model involved selling cameras at affordable prices and generating revenue through film sales. While the initial investment in a Kodak camera was accessible to many, customers needed to continuously purchase Kodak film, creating a recurring revenue stream for the company.
