Who owns Baldor electric motors?

What companies use ABB?

What does VFD stand for? VFD stands for Variable Frequency Drive. It is a type of motor controller that drives an electric AC motor by varying the voltage and frequency of its power supply. By adjusting the frequency of the AC voltage being supplied to the motor, the VFD is able to control the speed of the motor.

What is the difference between a VFD and VSD? A variable frequency drive (VFD) refers to AC drives only and a variable speed drive (VSD) refers to either AC Drives or DC Drives. VFDs vary the speed of an AC motor by varying the frequency to the motor. VSDs referring to DC motors vary the speed by varying the voltage to the motor.

Is Baldor a good electric motor? Baldor motors are best known for their energy efficiency. Their line of Super-E® motors meets and exceeds the NEMA Premium® efficiency standards. The standard industrial motor sits around 88% efficiency, while the Baldor•Reliance® Super-E® motors are upwards of 94.5% efficient.
