The Nature of Prejudice by Gordon Willard Allport

Question 1: What is prejudice?

According to Gordon Willard Allport, prejudice is an aversive or hostile attitude towards a person who belongs to a particular group. It is based on unfavorable feelings or beliefs about the group and its members, often without any personal contact or experience.

Question 2: What are the sources of prejudice?

Allport identified several factors that contribute to prejudice, including:

- Social categorization: Dividing people into groups based on perceived differences.
- Stereotyping: Attaching fixed and often negative characteristics to a group.
- Social competition: Perceiving another group as a threat to one's own resources.
- Personal frustration: Displacing anger or frustration onto an out-group.

Question 3: How does prejudice manifest itself?

Prejudice can take various forms, such as:

- Discrimination: Treating members of a group unfairly or depriving them of opportunities.
- Intolerance: Refusing to accept or respect the beliefs or opinions of others.
- Hate speech: Verbally attacking or inciting violence against a group.

Question 4: What are the consequences of prejudice?

Prejudice has negative consequences for both individuals and society. It can:

- Damage relationships and create social divisions.
- Lead to violence and discrimination.
- Undermine social cohesion and trust.

Question 5: How can we reduce prejudice?

Allport believed that prejudice could be reduced through contact and education. By interacting with members of different groups, individuals can challenge stereotypes and build empathy. Education can also help dispel myths and promote understanding of diverse cultures.
