**What is the meaning of dynamics of faith?** The dynamic of faith is when something is anticipated. As it is written in Hebrews 11:1: "Now faith is confidence in what we hope for and assurance about what we do not see" Faith is not a reaction to something, it is an anticipation. It is when we can understand the end without necessarily seeing the whole process.

**What is dynamic faith?** Dynamic faith is based on God's Word, and it involves the whole person. Dead faith touches the intellect; demonic faith touches both the intellect and the emotions, but dynamic faith involves the will. • The whole person plays a part in true saving faith.

**What is the gender of Bort in Land of the Lustrous?** Michelle Villanueva of Syfy stated that the gems are portrayed as non-binary, noting the relationship between Phosphophyllite "Phos" and Cinnabar, with Rutil having deep feelings for Padparadscha, saying that both have feelings for each other.

**Why is Land of the Lustrous on hiatus?** The reasoning behind the hiatus that began in 2022 remains a mystery as creator Haruko Ichikawa has been tight-lipped on the subject, but said hiatus is set to come to an end this spring.

**Is Land of the Lustrous queer?** However, fitting these tropes doesn't necessarily make *Land of the Lustrous* "bad representation" in and of itself. Even if none of the characters might identify as "queer" or "non-binary" in their setting and context, it's still a pretty queer series.

**How old is phosphophyllite hnk?** Being only 300 years old, Phosphophyllite is the youngest of the Gems and has no assignment yet. They want to help to fight the Moon Dwellers, but are too weak and brittle for battle. **Is Land of the Lustrous underrated?** All in all, there is so much beauty when it comes to this anime, and the manga continues that beauty to this day. They invade the Land constantly and attack the Gems in order to collect their gemstone bodies, using their shards to forge weapons and decorations.

**Is Seiya non-binary?** While she has both a female and male form in the '90s anime, Seiya is always female in the manga and merely disguises herself as a man. Overall, the general consensus seems to be that she and the other Starlights are non-binary and are often counted among the popular LGBTQ+ characters within the series.

**Is Haruka genderfluid?** Anime Haruka's gender presentation is a lot more simplified. She is a cisgender female (meaning that she identifies as a woman and was assigned female at birth), but only presents herself with a masculine appearance.

**What happened to Ghost Quartz?** As of Chapter 95, Ghost Quartz has become a Lunarian and therefore has lost their unique translucent physique.

**Does Land of the Lustrous get better?** Gets better and better, then worse and worse. Every episode got better and better until about the halfway mark, and then they all get worse from there. Honestly, I thought I was going to be able to give this show a 9 around the half way mark, but then I just kept getting disappointed over and over again.

**What happened to Phosphophyllite at the end?** Rutile attaches Lapis' head to Phos' body and the Gems await the results. A hundred and two years later,

Phosphophyllite finally reawakens. They are surprised by their new head, but accepts it easily and think they have become very cute.

**Did Phos love Antarc?** Antarc changes Phos' life: they admire Antarc, they dote on them like a younger sibling because the one Phos shares with them is Phos' first meaningful relationship (and maybe Antarc's too).
