True or False Answers to My Questions

1. **True or False:** The Earth is flat.

Answer: False. The Earth is spherical, as evidenced by satellite imagery and other scientific observations.

2. **True or False:** The sun is a planet.

Answer: False. The sun is a star, a massive ball of gas that emits its own light and heat. Planets, on the other hand, are smaller celestial bodies that orbit stars.

3. **True or False:** Water boils at 100 degrees Fahrenheit.

Answer: False. Water boils at 100 degrees Celsius, or 212 degrees Fahrenheit. The boiling point of water varies depending on factors such as pressure and altitude.

4. **True or False:** All birds can fly.

Answer: False. Not all birds can fly. Some birds, such as ostriches, emus, and penguins, are flightless.

5. **True or False:** The human heart is on the left side of the chest.

Answer: True. The human heart is located slightly to the left of the center of the chest, between the lungs. The heart pumps blood throughout the body through a network of arteries, veins, and capillaries.

Unit 2: Microeconomics Lesson 2 Activity 12

Question:

What is the relationship between the quantity of a good demanded and its price?

Answer:

In general, as the price of a good increases, the quantity demanded will decrease. This is known as the law of demand.

Paragraph 2:

Question:

Explain how a change in consumer income will affect the demand curve.

Answer:

An increase in consumer income will shift the demand curve to the right, indicating that consumers will demand more of the good at every price level. Conversely, a decrease in income will shift the demand curve to the left.

Paragraph 3:

Question:

Describe how a technological advancement that lowers the cost of production will affect the supply curve.

Answer:

A technological advancement that reduces the cost of production will shift the supply curve to the right. This is because suppliers can now produce more of the good at each price level, leading to a lower equilibrium price and a higher equilibrium quantity.

Paragraph 4:

Question:

Explain the concept of market equilibrium and how changes in supply and demand affect it.

Answer:

Market equilibrium occurs when the quantity supplied equals the quantity demanded. Changes in supply and demand can disturb this equilibrium, leading to price adjustments until a new equilibrium is reached.

Paragraph 5:

Question:

Discuss the role of government interventions in affecting market equilibrium and their potential consequences.

Answer:

Government interventions, such as price ceilings or subsidies, can disrupt market equilibrium. Price ceilings can lead to shortages, while subsidies can lead to surpluses. Governments must carefully consider the intended and unintended consequences of such interventions.
