This was a badly conducted battle on the British part which resulted in the German armoured cruiser SMS Blücher being sunk and HMS Lion being badly damaged.

Solution Manual for Project Management: A Managerial Approach 8th Edition

Question: Explain the key principles of Gantt charts.

Answer: Gantt charts are graphical representations of project schedules that display tasks, dependencies, and durations. Key principles include:

- **Time Scale:** The chart uses a horizontal axis to represent time.
- **Task Bars:** Tasks are represented as horizontal bars, with the length of the bar indicating the duration.
- **Dependencies:** Arrows or lines connect dependent tasks, showing which tasks must be completed before others can start.
- **Shading:** Shading within the bars indicates progress or status.

Question: What are the different types of WBS structures?

Answer: The three main types of Work Breakdown Structures (WBS) are:

- **Hierarchical:** A tree-like structure where tasks are broken down into smaller subtasks, creating a hierarchical relationship.
- **Indented:** A simplified version of the hierarchical structure, where subtasks are listed beneath their parent task.
- **Network:** A graphical representation where tasks are connected with arrows to show dependencies.

Question: Describe the importance of risk management in project planning.

Answer: Risk management is essential in project planning because it helps identify, assess, and mitigate potential risks that could impact project success. It enables project managers to:

- Anticipate and prepare for potential problems.
- Develop strategies to reduce or eliminate risks.
- Allocate resources and establish contingencies.
- Enhance project robustness and increase the likelihood of achieving project objectives.

Question: What are the key elements of a project charter?

Answer: A project charter is a formal document that defines the scope, objectives, constraints, and key stakeholders of a project. Key elements include:

- **Project Name and Description:** Identifies the project and provides a brief overview.
- **Objectives:** Clearly states the intended outcomes of the project.
- **Scope:** Outlines the boundaries and deliverables of the project.
- **Constraints:** Lists any limitations or restrictions that impact the project.
- **Stakeholders:** Identifies the individuals or groups involved in and affected by the project.

Question: Explain the difference between planning and scheduling in project management.

Answer: Planning involves defining the scope, objectives, and deliverables of a project, while scheduling determines the sequence and timing of tasks. Planning is more strategic and occurs early in the project life cycle, while scheduling is more tactical and occurs later. Planning defines what to do, while scheduling specifies when and how to do it.
