What is the difference between OBIEE and Oracle analytics? What is the difference between OBIEE and OAC. Besides the fact that OAC is hosted in the Oracle Cloud and OBIEE runs on premises, there are other differences as well. OAC has an updated user interface and provides enhanced data visualization and data preparation features not available in OBIEE.

What is the latest version of OBIEE 12c? Oracle Business Intelligence 12c (12.2.1.4).

How to migrate OBIEE 12c to oac?

Why upgrade from OBIEE to OAC? Benefits of Migrating from OBIEE to OAC OAC is cloud-native, offering scalability, agility, and accessibility benefits. Lower TCO with OAC's subscription-based pricing and reduced infrastructure requirements. Advanced analytics solution with machine learning and natural language processing capabilities.

What are the disadvantages of OBIEE? On the other hand, OBIEE faces a huge drawback in this aspect. The end-users must rely a lot on the IT teams to perform their analysis, as OBIEE demands a tonne of technical know-how. Though the IT teams usually like OBIEE, it is not a favorite among the end-users due to the absence of self-service friendliness.

What are the advantages of Oracle analytics? With OAC, users can harness advanced analytics capabilities, including predictive analytics, statistical modeling, and machine learning. The platform's visual interface allows users to build and deploy machine learning models to uncover patterns, make predictions, and optimize business processes.

Is OBIEE being discontinued? We won't bury the lead, Oracle Business Intelligence Enterprise Edition (OBIEE) is going away to be replaced by Oracle Analytics Server (OAS), which is basically the on-prem version of OAC.

What is the new feature in Oracle 12c? Oracle Database 12c introduces a new multitenant architecture that makes it easy to deploy and manage database clouds.

Oracle 12c is a pluggable database environment, where we can plug multiple databases into single database container. All these databases then share same background processes and memory.

What is the maximum number of rows in OBIEE 12c? The default limit for rows to be downloaded is set to 65000. This can be increased and has been increased to the desired number, however even after doing this the export to Excel still fails.

What is the difference between OAS and OAC? As OAC's hosting is managed by Oracle in the cloud, the access to the hosted server and its configuration files are not accessible by customers. OAS, as it is hosted on-prem, the customers have access to the server and can modify configuration files based on their needs.

What is the latest Oracle analytics server version? We are proud to announce the general availability of Oracle Analytics Server 2024. This release introduces over one hundred new capabilities that enhance the analytics experience across all users within an organization.

What does obiee stand for? Oracle Business Intelligence Enterprise Edition.

What is the difference between Obiee 12c and OAC? While most of OBIEE customers are using OBIEE on-premise on their own server, Oracle Analytics Cloud is managed by Oracle in their data center, in the cloud. This is a major difference as the maintenance, update, upgrade and tuning are performed by Oracle and not the customer.

What is the full form of OAC in Obiee? Oracle Analytics Cloud (OAC) is a fully managed cloud-based BI and analytics platform from Oracle. It is designed as a single and complete platform that empowers business users and analysts to ask questions about their data — across any environment and from any device.

What is the difference between Obiee 11g and 12c? BI System User - in Oracle Business Intelligence 11g a BI System User was used for inter-process communication and when impersonating BI users. In Oracle Business Intelligence 12c internal trust mechanisms replace this functionality and the BI System User is no longer required or provisioned.

What is the difference between OBIEE and Hyperion? OBIEE has dashboard style reports and Hyperion is primarily for financial reporting.

What are the data sources of OBIEE? Physical layer. In simple terms, the physical layer is where your OBIEE gets directly connected with your different data sources. Some of the commonly used data sources are: Customer Relationship Management (CRM) system.

What is usage tracking in OBIEE? OBIEE provides Usage Tracking as part of the core product functionality. It writes directly to a database table every Logical Query that hits the BI Server, including details of who ran it, when, and information about how it executed including for how long, how many rows, and so on.

How good is Oracle analytics? Oracle Analytics Cloud is a pretty good tool for data analytics, visualization and reporting. It helps to build predictive models using machine learning algorithms.

Is Oracle analytics part of OCI? Native cloud: Oracle Analytics Cloud is an Oracle-managed service delivered on Oracle Cloud Infrastructure (OCI).

Is Oracle analytics cloud PaaS or SaaS? Oracle Analytics Cloud , for example, is delivered in a PaaS model, meaning the OAC Admin must choose when to deploy patches to not just the OAC software, but also to the servers running the OAC services in the Oracle Cloud .

What is Oracle analytics? Oracle Analytics streamlines all stages of analysis with embedded AI and machine learning capabilities, enabling better business decisions.

What is the primary difference between business intelligence and analytics? Some experts argue that business intelligence involves using historical data to make decisions about how a company should run in the present day, whereas business analysis may use historical data to predict what might happen in the future or how an organization can move forward.

What is Oracle analytics server used for? Oracle Analytics Server includes modern, AI-powered, self-service analytics capabilities for data preparation, visualization, enterprise reporting, augmented analysis, and natural language

processing/generation.

What is the difference between OAC and OAS? The main difference between OAS and OAC is related to hosting and administration. OAC is hosted and managed by Oracle, while OAS needs to be installed, configured and patched by you in your datacenter.
