**What is the dialogical model of education?** Dialogic teaching involves ongoing talk between teacher and students, not just teacher-presentation. Through dialogue, teachers can elicit students' everyday, 'common sense' perspectives, engage with their developing ideas and help them overcome misunderstandings.

**What is the theory of dialogic learning?** Dialogic education has been defined as engaging students in an ongoing process of shared inquiry taking the form of a dialogue and as Robin Alexander outlines in his work on dialogic teaching, it involves drawing students into a process of co-constructing knowledge.

**What are the 5 principles of dialogic teaching?** It is based on five principles described in Alexander (2008) as: collective, reciprocal, supportive, cumulative and purposeful. The principles of dialogic teaching provide a framework to develop purposeful and authentic learning activities.

**What is an example of dialogic teaching?** Pupils are encouraged to discuss with a group or a partner to help them formulate an answer. The teacher involves a number of pupils in the answer to a single question, creating the opportunity for discussion through phrases such as "What do you think?" and "Do you agree with that answer?"

**What are the benefits of dialogic teaching?** The advantage of dialogic teaching is that teachers and children think together, sharing ideas and considering a variety of ideas, raising new questions and taking time to decide what to work on next.

**What are the three principles of dialogic theory?** The dialogic theory is based on three overarching principles: Dialogue is more natural than monologue. Meanings are in people not words. Contexts and social situations impact perceived meanings (Bakhtin, 2001a; Bakhtin, 2001b).

**How can a teacher apply dialogic education in the classroom?**

**What are the disadvantages of dialogical teaching?** It is easy for students to get loud and create a noisy atmosphere in the classroom when they are not encouraged to listen but just to talk. Dialogical methods also require more time and effort than other methods because teachers must constantly try to keep up with student questions and respond thoughtfully.

**Why is dialogue important in education?** This dialogue also brings educational reality [8]. Through dialogue, it is also possible to analyse specific information from different points of view. It thus provides a holistic approach. Research [9] confirms that dialogue-based learning represents an inclusive pedagogy, as it enables epistemological plurality.

**What are the principles of dialogue education?**

**Is dialogic teaching a pedagogy?** From this perspective, dialogue is a desirable outcome of education in itself; dialogic pedagogy involves teaching for dialogue as well as through dialogue.

**Why is dialogical education important?** Being collaborative and supportive, it confers social and emotional benefits too. It also helps teachers: by encouraging students to share their thinking it enables teachers to diagnose needs, devise learning tasks, enhance understanding, assess progress, and guide students through the challenges they encounter.

**What is the opposite of dialogic teaching?** Authoritative talk is the opposite of dialogic talk.

**What is a dialogical model?** A Dialogic Model of constructing a unified reply message is suggested in which differences between perspectives are valued, rather than minimized. In this model, a diversity of views is seen as a virtue.
