**What is the hardest thing in college algebra?** According to study, the following algebra topics were found to be the most difficult for students to master: 1) - Multiplying Polynomials by Monomials. 2) - Modeling Using Exponential Functions. 3) - Averaging Data with Different Units.

**What grade level is intermediate algebra?**

**What grade is beginning algebra?** Typically, algebra is taught to strong math students in 8th grade and to mainstream math students in 9th grade.

**What grade is algebra 1 usually taught?** Some schools may offer Algebra I in either 9th/10th grade OR 11th/12th grade, but not both. Nonetheless, it is important that students have access to Algebra I sometime in their high school career.

**What is the most failed course in college?**

**Why do so many students fail algebra?** Algebra is overwhelming for many students because it's the first math class they take where they must wrestle with variables, abstract concepts, and creative problem solving. And there's often not enough done in the classroom to connect Algebra to their everyday lives and explain why it's worth understanding.

**Do most people fail college algebra?** Nationwide, almost half of the students who enroll in mathematics college algebra courses at colleges and universities fail or fail to complete the course (Summerlin; Toubassi, 1999; Weinstein, 2004). At UVSC it is
