How do you reset the Bose Acoustimass?

Can Bose Acoustimass 6 work with any receiver? A: Yes, but it does depend on how much power (watts) your receiver has. If it has more than the Bose wattage (mine does), don't crack it all the way up.

How do I know if my Bose is broken?

Why did my Bose suddenly stop working? Battery is damaged or not charged. Make sure the battery is fully charged before removing it from the A/C power source. This will ensure the battery has an adequate charge to function. The battery may be damaged or can no longer function. This can happen over time with general wear and tear.

Really makes it feel like I am in the movie theater!

Why isn't my Bose subwoofer working? Try resetting the bass module by disconnecting power for 30 seconds. Disconnect the power cord from the back of the

bass module or from the power outlet. Wait 30 seconds, then reconnect power and try again.

How do I know if my Bose case is charging? The battery light blinks amber while charging and glows solid green when charged.

Why is my Bose sound not working? Check the condition of the speaker wires and be sure they are secure at both ends. Check the speaker wires for any kinks, scratches, cuts or damage. Replace any damaged wires and check that they are securely connected at both ends.
