### **Understanding Business: 10th Edition by Nickels**

Nickels' "Understanding Business" is a comprehensive textbook that provides a thorough understanding of the fundamental principles and practices of business. The 10th edition features updated content, case studies, and real-world examples to keep students engaged and informed.

#### **1. What is the main purpose of a business?**

According to Nickels, the main purpose of a business is to create value for customers and make a profit. Businesses achieve this by offering products or services that meet the needs and wants of consumers while operating efficiently and effectively.

#### **2. What is the difference between a public and a private company?**

A public company is one whose shares are traded on a stock exchange. This allows investors to buy and sell shares in the company, which raises capital for the business. Private companies, on the other hand, are not traded on a stock exchange and are owned by a small group of individuals or entities.

#### **3. What are the four basic functions of management?**

Nickels identifies four basic functions of management: planning, organizing, leading, and controlling. Planning involves setting goals and developing strategies to achieve them. Organizing involves structuring the organization's resources (e.g., people, equipment, information) to support the achievement of goals. Leading involves

motivating and directing employees to work towards common goals. Controlling involves monitoring performance and making adjustments to ensure that goals are met.

#### **4. What are the different types of organizational structures?**

Nickels presents three basic types of organizational structures: functional, divisional, and matrix. A functional structure groups employees based on their expertise (e.g., marketing, finance, operations). A divisional structure groups employees based on the products or services they offer or the geographic areas they serve. A matrix structure combines elements of both functional and divisional structures, creating a hybrid organization.

#### **5. What are the ethical responsibilities of a business?**

Nickels emphasizes the importance of ethical behavior in business. Businesses have ethical responsibilities towards their customers, employees, suppliers, creditors, the community, and the environment. They must operate with integrity, protect the rights of others, and contribute to the well-being of society.

### **Wheeler's Dental Anatomy, Physiology, and Occlusion 10th Edition: Q&A**

**Q: What is the primary function of the enamel in teeth?** **A:** Protection and strength. The enamel acts as a hard, protective layer that shields the underlying dentin and pulp from damage.

**Q: Describe the different types of teeth and their functions.** **A:** There are four main types of teeth in humans: incisors (cutting), canines (tearing), premolars (crushing), and molars (grinding). Each type has a specific shape and function that aids in the breakdown of food for digestion.

**Q: What is the role of the periodontal ligament in tooth support?** **A:** The periodontal ligament is a fibrous tissue that connects the tooth to the surrounding bone. It acts as a shock absorber, protects the tooth from excessive forces, and provides sensory feedback for proprioception (awareness of tooth position).

**Q: Explain the concept of occlusion and its importance.** **A:** Occlusion refers to the alignment and contact of the teeth when the jaws are closed. Proper occlusion is essential for proper chewing, speech, and overall oral health. Malocclusion (incorrect alignment) can lead to a range of functional and aesthetic problems.

**Q: What are the main factors that contribute to the development of dental caries (tooth decay)?** **A:** Dental caries are caused by a combination of factors, including the presence of bacteria (*Streptococcus mutans*), the availability of fermentable carbohydrates (sugar), and the susceptibility of the tooth to acid erosion. Good oral hygiene, regular checkups, and a balanced diet are crucial for preventing caries.
