How to calculate p value? The p-value is calculated using the sampling distribution of the test statistic under the null hypothesis, the sample data, and the type of test being done (lower-tailed test, upper-tailed test, or two-sided test). The p-value for a lower-tailed test is specified by: $p\text{-value} = P(TS \leq ts \mid H_0 \text{ is true}) = \text{cdf}(ts)$

How can I make statistics easier to understand? Focus on concepts, not formulas. It's easier to learn statistical concepts – what each formula means and what it can help you figure out – rather than long, complicated formulas. Focus on learning the concepts behind the formulas – you can always look up the formulas later.
