**How hard is Chem 121 UBC?** In terms of course content, I don't believe Chem 121 is too hard. This may just be based on personal bias but the content in the CHIRP itself is not terribly difficult to understand. That being said, doing practice problems is a must in this class in order to gain confidence.

**Does organic chemistry 2 have a lab?** Organic Chemistry II (CHE 232E/CHE 234LE) is an online, asynchronous, self-paced course that includes both a 3-credit lecture session and a 1-credit laboratory session.

**What is chemistry 121 about?** Subjects include science and measurement; atomic, ionic and molecular structures; naming chemicals; quantitative relationships within compounds and in reactions; gas laws; solutions; acids and bases; and nuclear reactions and radiation.

**What is the hardest chemistry in college?** The level of difficulty can vary based on personal strengths, weaknesses, and your professor's teaching style, but many chemistry majors typically find Physical Chemistry to be among the most challenging courses. This course blends principles of physics and chemistry to an extent not usually seen in other courses.

**Is Chem 101 hard in college?** There are a few reasons college chemistry is difficult: It moves a lot faster than in high school chemistry and goes into greater depth. If you're not careful you'll quickly fall behind. You aren't going to be able to pass by memorization alone—you have to learn to solve problems.

**Is Chem 121 hard in SFU?** Average Student Rating Pretty much a repeat of Chem 11 in BC just with a few extra units and details. Highly recommend taking with Leznoff or Warren as they are both really good lecturers and pretty funny. If you did well in chem in high school this course shouldn't be too bad.

**Is Orgo 2 similar to Orgo 1?** In terms of difficulty, Orgo 2 poses a greater challenge because it builds upon the concepts learned in Orgo 1 and demands a deeper understanding, as well as the ability to integrate and apply knowledge.

**How many people fail organic chemistry 2?** Currently, the fail rate for organic chemistry across the nation is over 50%, with the course being described as the ultimate weed- out course. 1 It has a notorious reputation, and many professors have difficulty achieving high success rates in their classes.

**Do I need orgo 2 for med school?** Since most medical schools will require a C or better in your prerequisites, keep in mind that you'll need to retake Organic Chemistry I as well as Organic II.

**Is Chem 121 general chemistry?** A fundamental course in inorganic chemistry including atomic structure, chemical bonding, stoichiometry, chemical reactions, thermochemistry, electronic configurations, molecular geometry, molecular orbitals, and gases.

**What is the difference between Chem 111 and Chem 121?** CHEM 111, 113 or CHEM 121, 123 is the normal prerequisite for admission to chemistry specializations. The difference between the two lies in the background of the student: those students with credit for Chemistry 11 only take CHEM 111, 113, whereas those with credit for Chemistry 12 take CHEM 121, 123.
