2. How does the novel explore race and identity? "The Hate U Give" provides a multifaceted perspective on race and identity, highlighting the intersectionality of race, class, and gender. The MLA Format Exercise Packet: In-Text Citations

The Modern Language Association (MLA) format is widely used in academic writing to document sources and prevent plagiarism. In-text citations are an essential part of MLA formatting, and they provide readers with information about the source being cited.

1. What is an in-text citation? An in-text citation is a brief reference to a source that is included within the body of a written work. It provides the author's last name and the page number(s) where the information can be found in the original source.

2. When should I use an in-text citation? You should use an in-text citation any time you paraphrase, summarize, or quote directly from another source.

3. What are the basic rules for in-text citations?

- Place the author's last name and the page number(s) in parentheses at the end of the sentence where the information is cited.
- If the author's name is mentioned in the text, only include the page number(s) in parentheses.
- If the work has no page numbers, use the paragraph number(s).
- If the work is a website, include the title of the page in quotation marks and the website's URL.

4. Provide an example of an in-text citation. If you were citing the following sentence from the book "The Catcher in the Rye" by J.D. Salinger:

"I'm afraid of things like elevators and subways. I'm afraid of lots of things" (Salinger 10).

The in-text citation would be: (Salinger 10).

5. How can I practice using in-text citations? The MLA Format Exercise Packet provides practice exercises that allow you to test your understanding of in-text
