Simple Invoicing Desktop Database with MS Access 2013/2016

Q: What is the purpose of a simple invoicing database using MS Access 2013/2016? A: It simplifies the process of creating and managing invoices for small businesses and individuals. It provides a structured way to keep track of customer information, products or services offered, and payment details, allowing for quick and accurate invoice generation.

Q: What are the key features of such a database? A: The database includes tables for customers, products or services, and invoices. It enables you to add, edit, and retrieve customer data, create and save invoices based on selected products or services, and track invoice status (e.g., paid, unpaid, overdue).

Q: How is the database used to create invoices? A: When creating an invoice, the user selects the customer and adds the desired products or services. The database calculates the total amount due automatically based on predefined pricing. The user can then preview the invoice and generate it in a professional-looking format.

Q: What reporting capabilities does the database offer? A: The database provides reports that summarize invoice data, such as total sales by customer or product, overdue invoices, and unpaid invoices. These reports help users analyze their invoicing performance and make informed business decisions.

Q: Is the database easy to use for non-technical users? A: Yes. MS Access 2013/2016 features a user-friendly interface and wizards that guide non-technical users through the process of creating and using the database. The tables and forms are designed to be intuitive, making data entry and invoice creation quick and straightforward.
