**Is the Boeing 737-900 the same as the 737 MAX 9?** The 737-900ER is more widely used than the 737 MAX 9. It is an older model but has the same optional door plug design that allows for the addition of an extra emergency exit door when carriers opt to install more seats.

**What is the best version of the 737?** The 737-800 is the best-selling 737NG variant. Southwest Airlines (as seen in this picture) is the largest operator. The 737NG is an upgrade of the 737 Classic (7300/-400/-500) series.

**Which version of the 737 MAX crashed?** Ethiopian Airlines Crash The pilot requested a return to the airport, but the Boeing 737 MAX 8 crashed approximately 39 miles southeast of the airport, killing all on board. **What is the largest version of the 737?** The 737-10 is the largest MAX plane, with a maximum seating capacity of 230. It is a competitor of Airbus's (AIR.PA) , opens new tab A321neo, which dominates the single-aisle narrowbody market. The 737 MAX 10 can fly up to 3,100 nautical miles (3,567 miles) and measures 43.8 meters in length.

**What is the difference between Boeing 737 700 and 737-800?** In comparison to the 737-700, the 737-800 also features the new Sky Interior with a sculpted ceiling

**Why did they stop making 737?**

**Is it safe to fly in a 737 Max?** Is it still safe to fly? In clearing the Boeing 737 Max 9 to fly following rigorous inspection, the FAA is saying “yes.” FAA Administrator Whitaker underlined that point to CNN's Pete Muntean earlier this week. “If the aircraft is ungrounded, that means that we believe it's airworthy.

**Which 737 keeps crashing?** Key events in the troubled history of the Boeing 737 Max Airlines have flown Max jets for just seven years, but in that short time two of them crashed, killing 346 people, and the plane has become a symbol of safety concerns swirling around Boeing.

**How many Boeing 737 Max 8 have crashed?** In a financial filing on Wednesday, the company reported having paid \$400 million to 737 Max customers in 2023, after paying \$1 billion in 2022. All told, those two crashes and the grounding of the Max 8 for nearly two years cost Boeing about \$20 billion.

**Which version of the 737 MAX is grounded?** January 9, 2024 Every Boeing 737-9 MAX with a plug door will remain grounded until the FAA finds each can safely return to operation. To begin this process, Boeing must provide instructions to operators for inspections and maintenance.

**What is the difference between Boeing 737 MAX 7 and 8 and 9?** The MAX 7 has a range of 3,850 nautical miles (7,130 kilometers), while the MAX 8 and 9 have a slightly lower range of 3,550 nautical miles (6,570 kilometers). This allows the aircraft to narrowly beat the 3,500 NM (6,482 km) mark set by the A320neo but still comes in below the A321neo's 4,000 NM (7,408 km).

**What is the most popular model of the 737 MAX?** 737 MAX 8. The MAX 8, with a maximum seating capacity of 210, has a range of 3,500 nautical miles (4,028 miles) and is 39.52 meters long. It is the most popular MAX variant, with 1,179 aircraft in

service and 1,973 on order, according to Cirium.

**What is the difference between 737 MAX 7 and 737 700?** Originally based on the Boeing 737-700, the 737 MAX 7 can fly 1,000 nautical miles further than the 737-700 with two more rows of seats and 18% less fuel cost per seat. The empty weight of a Boeing 737 MAX 7 is 138,699 lbs, and its maximum takeoff weight is 177,000 lbs.
