Why am I bad at algebra but good at geometry? Some students may find geometry easier due to its visual nature and concrete representations. In contrast,

others might excel in algebra because of their logical reasoning skills. In geometry, students rely heavily on visualizing shapes, angles, and spatial relationships.

Why do so many people fail algebra 1? Algebra is overwhelming for many students because it's the first math class they take where they must wrestle with variables, abstract concepts, and creative problem solving. And there's often not enough done in the classroom to connect Algebra to their everyday lives and explain why it's worth understanding.

Why is algebra 2 so much harder than algebra 1? What makes Algebra 2 harder than Algebra 1 is that it asks you to take the basic ideas you learned before and use them to solve problems that are a lot more challenging. You have to think more deeply and creatively to figure out these tougher problems.
