Clinical Pharmacy: Enriching Patient Care\*\*

### **What is Clinical Pharmacy According to ACCP?**

The American College of Clinical Pharmacy (ACCP) defines clinical pharmacy as a specialized branch of pharmacy that integrates the science of medications with patient care.

### **What is an ACCP in Medical Terms?**

ACCP is an acronym for Activated Clotting Time Probe, a medical test that measures the time it takes for a blood clot to form.

### **What is the Meaning of Clinical Pharmacist?**

A clinical pharmacist is a healthcare professional who specializes in the safe and effective use of medications. They work in collaboration with other healthcare providers to optimize patient outcomes.

### **Primary Focus of Clinical Pharmacy**

The primary focus of clinical pharmacy is on providing pharmaceutical care to patients, which involves:

- Assessing patient medication needs
- Developing and implementing medication regimens
- Monitoring and adjusting medications as needed

- Educating patients about medications

## **ACCP Guideline**

An ACCP guideline is a set of recommendations developed by a panel of experts to guide clinical practice in a specific area. These guidelines are based on evidence and intended to improve patient care.

## **Difference Between Clinical Pharmacy and Community Pharmacy**

Clinical pharmacy focuses on the management of medications in a hospital or other healthcare setting, while community pharmacy primarily dispenses medications to patients outside of a healthcare institution.

## **4 Pillars of ACCP**

The 4 pillars of ACCP are:

- Education
- Research
- Practice
- Advocacy

## **Normal ACCP Level**

A normal ACCP level in blood is 80-100 seconds.

## **ACCP Test**

An ACCP test is performed by taking a blood sample and measuring the time it takes for a clot to form when a reagent is added.

## **Difference Between Clinical Pharmacy and Clinical Pharmacology**

Clinical pharmacy focuses on the practical application of medications in patient care, while clinical pharmacology studies the effects of medications on the body.

## **Difference Between Pharmaceutical Care and Clinical Pharmacy**

Pharmaceutical care is a broader term that encompasses the provision of medication-related services, while clinical pharmacy specifically refers to the role of pharmacists in patient care involving medication management.

### **Basics of Clinical Pharmacy**

- Pharmacology: Understanding medications and their effects
- Pathophysiology: Studying the mechanisms of disease
- Therapeutics: Selecting and using medications to treat diseases
- Communication: Effectively communicating with patients and other healthcare providers

### **ACCP Stands For:**

- American College of Clinical Pharmacy

### **Objective of Clinical Pharmacist**

To improve patient outcomes through the safe and effective use of medications.

### **Types of Clinical Pharmacy Interventions**

- Medication reconciliation
- Medication review
- Pharmacokinetic monitoring
- Patient education
- Drug information

### **ACCP Guidelines for VTE Prophylaxis**

ACCP provides guidelines for the prevention of venous thromboembolism (VTE), which include recommendations for the use of anticoagulants.

### **ACCP ASNT**

ACCP ASNT refers to the ACCP Antithrombotic, Thrombolytic, and Cardiovascular Risk Reduction Network, which focuses on research and education in the field of

thrombosis.

### **INR Guidelines for ACCP**

ACCP provides guidelines for the use of the international normalized ratio (INR), which is a laboratory test used to monitor patients taking anticoagulants.

### **Clinical Pharmacist vs. Pharmacist**

Yes, a clinical pharmacist is a pharmacist who has additional training and experience in patient care.

### **Role of Clinical Pharmacist in Community Pharmacy**

In community pharmacy, a clinical pharmacist can provide medication management services, medication reviews, patient education, and disease state management.

### **Types of Community Pharmacy**

- Chain pharmacy: A large, corporate-owned pharmacy that operates multiple locations.
- Independent pharmacy: A privately owned pharmacy that is not part of a chain.

### **Classification of a Clinical Pharmacist**

Clinical pharmacists can be classified by their area of specialization, such as:

- Critical care
- Oncology
- Infectious diseases
- Pediatrics

### **Clinical Pharmacy and Pharmaceutical Care**

Clinical pharmacy and pharmaceutical care are closely related, with pharmaceutical care representing the broader framework that encompasses the provision of all medication-related services, including clinical pharmacy.

## Clinical Pharmacy and Biopharmacy

Biopharmacy is a branch of pharmacy that studies the absorption, distribution, metabolism, and excretion of medications in the body. It is closely related to clinical pharmacy, as knowledge of these processes is essential for effective medication management.

## Clinical Research Pharmacy

Clinical research pharmacy involves the design, conduct, and analysis of clinical trials to evaluate the safety and efficacy of new medications.
