### **The First European Description of Japan: 1585**

#### **A Critical English Language Edition of Striking Contrasts in the Customs of Europe**

##### **Introduction**

In 1585, Portuguese Jesuit missionary Luís Fróis penned the "Tratado em Que se Contém Muito Sunta e Boa Doutrina Acerca dos Costumes e Geres desta Terra do Japão", the first European account of Japan. This groundbreaking work provides a detailed description of Japanese society, culture, and customs, offering a unique insight into this enigmatic land during the late 16th century.

##### **Historical Context**

Fróis's account was written at a pivotal moment in Japanese history. The country was undergoing a period of political and social upheaval, with the rise of powerful feudal lords and the emergence of Christianity. European traders and missionaries were also beginning to arrive in Japan, introducing new ideas and technologies that would profoundly impact its society.

##### **Contents of the Treatise**

Fróis's treatise is divided into four parts. The first describes Japanese customs and beliefs, including their religion, marriage practices, and social hierarchy. The second part focuses on Japanese arts and sciences, such as painting, music, and medicine. The third part discusses the Japanese language and literature. The fourth part provides a detailed account of the persecution of Christians in Japan.

### **Striking Contrasts with Europe**

One of the most striking features of Fróis's treatise is its emphasis on the contrasts between Japanese and European customs. He marvels at the politeness and hospitality of the Japanese people, but he is also shocked by their lack of privacy and their strict social conventions. Fróis also notes the differences in religious beliefs, art forms, and political systems between the two cultures.

### **Conclusion**

Fróis's account remains an invaluable source of information about Japan in the late 16th century. It provides not only a historical record but also a unique perspective on the complex and fascinating culture of Japan. By highlighting the striking contrasts between Japanese and European customs, Fróis's work helps us to better understand the profound differences that existed between these two worlds.

**What are the optical processes in semiconductor?** The interaction of electrons and photons is the basis of all semiconductor optoelectronic devices. There are two kinds of events that occur when electron-photon interactions occur: (i) absorption of photons, where the electron gains energy by absorbing a photon; and (ii) emission, where the electron emits a photon...

**What is an optical process?** Optical Processing. An optical processor lets us analyze an image and synthesize the image with various modification by optical means. A standard optical processor consists of two equal converging lenses with focal lengths  $f$  separated by a distance  $2f$ .

**What are the different types of optical transitions in a semiconductor?** Two types of such transitions can be distinguished: (1) direct transitions where the momentum of the resulting electron-hole pair is very close to zero, and (2) indirect transitions where the resulting electron-hole pair has a finite momentum.

### **The Portable Machiavelli: A Guide to the Classics of Political Philosophy**

The Portable Machiavelli is a collection of Niccolò Machiavelli's most influential works, including *The Prince*, *The Discourses on Livy*, and *Art of War*. Compiled by renowned political philosopher Leo Strauss, this volume offers a comprehensive introduction to Machiavelli's revolutionary ideas on statecraft, power, and human nature.

#### **1. What is the central argument of *The Prince*?**
