

CHAPTER 27 SECTION 5 GUIDED READING IMPERIALISM IN SOUTHEAST

[Download Complete File](#)

What does the land of Southeast Asia form part of? Just as the European powers rushed to divide Africa, they also competed to carve up the lands of Southeast Asia. These lands form part of the Pacific Rim, the countries that border the Pacific Ocean.

How did the Dutch and the United States gain control of lands in Southeast Asia? In summary, the Dutch gained control of lands in Southeast Asia through the establishment of the VOC and trade monopolies, while the United States gained control through a combination of military intervention and political strategies, as seen in the Philippines and the Vietnam War.

What type of land is in the southeast? The states in the upper part of the region have rolling hills, rich river valleys and high flat areas called plateaus. The states in the lower part of the region have beaches, swamps, and wetlands. The Appalachian Mountains cover most of the upper part of the Southeast region.

What is Southeast Asia called? The mainland section of Southeast Asia was referred to as Indochina by European geographers due to its location between China and the Indian subcontinent and its having cultural influences from both neighbouring regions.

What caused imperialism in Southeast Asia? In the mid to late 19th century, the European powers colonized much of Africa and Southeast Asia. During the decades of imperialism, the industrializing powers of Europe viewed the African and Asian

continents as reservoirs of raw materials, labor, and territory for future settlement.

What was the new imperialism in Asia? During the era of New Imperialism, the European powers (and Japan) individually conquered almost all of Africa and parts of Asia. The new wave of imperialism reflected ongoing rivalries among the great powers, the economic desire for new resources and markets, and a "civilizing mission" ethos.

For what two reasons was Southeast Asia important to European imperialism? As the world entered the years before World War II, another major reason for European involvement in Southeast Asia emerged. Oil was discovered throughout Indonesia and Malaysia, and the climate was perfect for growing trees for rubber. Before, Southeast Asia had been a land that required protection.

What is the land form of Southeast Asia? Southeast Asia's landscape is characterized by three intermingled physical elements: mountain ranges, plains and plateaus, and water in the form of both shallow seas and extensive drainage systems.

What are the lands of Southeast Asia? Southeast Asia is composed of eleven countries of impressive diversity in religion, culture and history: Brunei, Burma (Myanmar), Cambodia, Timor-Leste, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand and Vietnam.

What forms part of the island Southeast Asia region? Island or maritime Southeast Asia includes Malaysia, Singapore, Indonesia, the Philippines, Brunei, and the new nation of East Timor (formerly part of Indonesia).

What two parts is Southeast Asia divided into? Southeast Asia can be studied by dividing up the realm into two geographic regions: the mainland and the insular region. The mainland borders China and India and has extensive river systems. The insular region is made up of islands and peninsulas between Asia and Australia, often with mountainous interiors.
