Why is time the fourth dimension? The fact that time is nonetheless different from the three spatial dimensions is why we single time out. Time is the fourth dimension because it makes sense to group the three spatial dimensions together as the first three. If one day we discover a fourth spatial dimension, then time would become the fifth dimension.

Did Einstein say time is the 4th dimension? According to Einstein , you need to describe where you are not only in three-dimensional space —length, width and height—but also in time. Time is the fourth dimension. So to know where you are, you have to know what time it is.

Do we exist in the 4th dimension? We move through three dimensions. Or do we? String theorists believe our world encompasses more than three dimensions. Without experiential evidence, the mathematical theory of space and time as a fourth dimension has remained just that since the days of Albert Einstein: a theory.
