## [Download Complete File](#)

**What is the Herzberg theory of job satisfaction?** Frederick Herzberg theorized that employee satisfaction has two dimensions: “hygiene” and motivation. Hygiene issues, such as salary and supervision, decrease employees' dissatisfaction with the work environment. Motivators, such as recognition and achievement, make workers more productive, creative and committed.

**What is the Herzberg's two-factor theory?** The theory comprises two factors: motivation and hygiene. Motivation factors, such as a sense of achievement and responsibility, aim to inspire and engage employees. Hygiene factors, such as salary and working conditions, are necessary for employees to maintain satisfaction in the workplace.

**What is Herzberg's two-factor model of customer satisfaction?** Herzberg's theory suggests that there are two types of factors that influence motivation: hygiene factors and motivators. Hygiene factors are the basic needs that must be met to avoid dissatisfaction such as website usability, security, and product information.

**What are examples of Herzberg's factors for dissatisfaction?** Results. The following job dissatisfaction factors (hygiene) were identified: health and safety, heavy workload, salary, promotion, recognition and organizational policies. The satisfaction (motivators) were: relationships with co-workers, relationship with leaders, and professional development.

**What is the Herzberg two-factor theory and concept of job enrichment?** Herzberg's two-factor theory is a well-known concept in the field of human resource management and organizational behavior. This concept puts forward two factors that

motivate employees: job satisfaction and job dissatisfaction. While these might seem like opposites, they work together in a cycle.

### **How to use Herzberg's two-factor theory?**

**What are the two sets of factors in Herzberg's two-factor theory?** He's especially recognized for his two-factor theory, which hypothesized that there are two different sets of factors governing job satisfaction and job dissatisfaction: "hygiene factors," or extrinsic motivators and "motivation factors," or intrinsic motivators.

**Which of the following are in Herzberg's two-factor theory?** Frederick Herzberg identified two types of needs that became the basis of his two-factor model. They are hygiene factors and motivator factors.

**What are the advantages of Herzberg's two-factor theory?** Applying Herzberg's theory to your team management can have several benefits for your team and your organization. By addressing both hygiene factors and motivators, you can increase your team's satisfaction, engagement, and loyalty, which can lead to higher productivity, quality, and performance.

**What is the two-factor theory of customer satisfaction?** Herzberg's two factor theory is used to identify hygiene and motivating factors in consumer behavior. It can be applied to various industries, including healthcare services. The theory helps in understanding the determinants of quality perception and customer satisfaction.

**What is an example of the two-factor theory?** Stanley Schachter, a famous psychologist, proposed the two-factor theory of emotions, which said that people label their emotions according to their environment and their physiological cues. So, for example, when your heart started racing and your palms began to sweat, you needed to know why you felt that way.

**What according to Herzberg's two-factor theory satisfaction results from quizlet?** According to Herzberg's two-factor theory, satisfaction results from the presence of motivating factors. According to Vroom's expectancy-valence theory, valence is: the value a person places on the outcome of a particular behavior.

**What is the job satisfaction theory of Herzberg?** Herzberg's Two-Factor Theory proposes that two sets of factors influence job satisfaction: hygiene factors and motivators. Hygiene factors, like salary and working conditions, don't motivate but can cause dissatisfaction if inadequate.

**What does Herzberg's theory explain?** Herzberg's motivation theory is one of the content theories of motivation. These attempt to explain the factors that motivate individuals through identifying and satisfying their individual needs, desires and the aims pursued to satisfy these desires. This theory of motivation is known as a two factor content theory.

**What is the conclusion of the Herzberg two factor theory?** There is a strong positive correlation ( $R=0.688$ ) and it is significant at 0.01 level which means as the satisfaction about hygiene factors increases the motivation of employees also increases. Conclusion: The study concludes that there is a strong relationship between hygiene factors and motivation factors.

**What is the application of Herzberg's two-factor theory?** Herzberg's two-factor theory holds that employers cannot choose between motivation or hygiene but instead must strive to improve both. Employers can tailor company policy to improve employee welfare and thus avoid low motivation and low hygiene simultaneously.

**What are the assumptions of Herzberg's two-factor theory of motivation?** Basic assumptions of Herzberg's theory are: Presence of Hygiene factor will not cause satisfaction but their absence will cause dissatisfaction. HERZBERG isolated two different sets of factors affecting motivation and satisfaction at work.

**What is the two-factor theory also known as?** The two-factor theory (also known as Herzberg's motivation-hygiene theory and dual-factor theory) states that there are certain factors in the workplace that cause job satisfaction while a separate set of factors cause dissatisfaction, all of which act independently of each other.

**What are the theories of job satisfaction?** The four main factors that affect job satisfaction are job conditions, personality, pay, and corporate social responsibility. The four main theories that help in understanding job satisfaction are Maslow's Hierarchy of Needs, the Motivation-Hygiene Theory, the Job Characteristics Model,

and the Dispositional approach.

**What is an example of a motivator from Herzberg's theory?** Examples of motivators are achievement, recognition, and responsibility. Herzberg referred to the process of focusing on motivators at work as "job enrichment." In Herzberg's theory, job satisfaction and job dissatisfaction do not exist on the same spectrum.

**Which of the following is correct about Herzberg's two-factor theory?** The correct answer regarding Herzberg's two-factor theory is C) Herzberg's theory has influenced how we currently design jobs. **What is an example of Herzberg's motivation-hygiene theory?** Hygiene factors guard against job dissatisfaction, and motivators contribute to job satisfaction. Examples of hygiene factors are work relationships, supervisor relationships, working conditions and environment, and salary. Examples of motivators are achievement, recognition, and responsibility.

**What are the components of the Herzberg's motivation theory?** Based on Herzberg's motivation theory, Tesco identified the components that lead to employee satisfaction (achievement, responsibility, advancement, a sense of challenge and enjoyment).
