What book is about Thomas Edison vs Westinghouse? His “Last Days of Night,” Random House, is a historical novel about the war of currents between Thomas Edison and George Westinghouse, along with Nikola Tesla, J.P. Morgan and Alexander Graham Bell.

What is the story of Edison and Westinghouse? The War of Currents raged in the late 1880s in with Westinghouse promoting alternating current (AC) and Edison showcasing direct current (DC) systems. It climaxed in the Electric Wire Panic of 1889, during which the word electrocution was coined to define death by electricity.

Is there a book about Nikola Tesla and Thomas Edison? War of the Currents, in my opinion, is a very in-depth, and detailed book about Nikola Tesla and Thomas Edison, although slightly short, it was entertaining to read and very interesting.

What was George Westinghouse's most famous invention? In April of 1869, he obtained a patent for one of his most important inventions, the air brake. This device enabled trains to be stopped with fail-safe accuracy by the locomotive engineer for the first time and was eventually adopted on the majority of the world's railroads.

Who won the lawsuit between Edison and Westinghouse? Edison won the lamp lawsuit brought by Westinghouse but lost the “war.” Less expensive to build and operate, the AC system was increasingly favored by start-up utilities in the 1890s.

Who won the electricity war? Across the '70s and '80s, many defunct DC systems were used across Europe, including in London, UK, and in Stockholm, Sweden. Today, AC is used for almost 100% of electricity systems across the planet, making

it the one, true and sole winner of the battle of the currents.

What did Edison and Westinghouse disagree on? Edison was the champion of transmitting electricity by direct current, whereas Westinghouse thought that alternating current was a far more efficient way of delivering electricity since it could be transformed to higher voltages, which meant a lower loss of transmission over distances.

What is the movie about Westinghouse Edison and Tesla?

Is the Edison story true? This story is based on fact but isn't actually true. There was no letter, however, the 7-year-old Thomas Edison did have a massive dislike of the school system, and his teacher. He was called out in class as being 'addled' and he stormed home in disgust.

Did Thomas Edison and Nikola Tesla get along? Edison and Tesla were brutal competitors and Tesla actually worked for Edison for a short time, hired to work out the kinks in Edison's direct current electrical system. He decided to quit Edison's project to continue work on his own.

Did Thomas Edison ever learn to read? Edison had very little formal education as a child, attending school only for a few months. He was taught reading, writing, and arithmetic by his mother, but was always a very curious child and taught himself much by reading on his own.

Did Nikola Tesla like to read? Nikola Tesla was an avid lover of books, even vowing to finish reading an entire university library (foregoing sleeping). His favorites were The Bible, Faust by Goethe, and Adventure of Huckleberry Finn by Mark Twain. Mark Twain books, according to Tesla, helped him recover from illness.

Who bought Tesla's patents? In 1888, George Westinghouse, head of the Westinghouse Electric Company, bought the patent rights to Tesla's system of dynamos, transformers and motors.

What is Westinghouse called today? Westinghouse purchased CBS Inc. in 1994 for \$5.4 billion. Westinghouse Electric Corporation changed its name to and became the original CBS Corporation in 1997.

How did George Westinghouse treat his workers? He cared for the living conditions of his employees, as well as their educational and cultural growth as well as for their families. Already in the year 1869, WABCO became the first employer to implement a nine-hour day, 55-hour work weeks, and half-holidays on Saturdays.

What is the movie about Edison v Westinghouse? The Current War is a 2017 American historical drama film inspired by the 19th-century competition between Thomas Edison and George Westinghouse over which electric power delivery system would be used in the United States (often referred to as the "war of the currents").

What did Edison and Westinghouse disagree on? Edison was the champion of transmitting electricity by direct current, whereas Westinghouse thought that alternating current was a far more efficient way of delivering electricity since it could be transformed to higher voltages, which meant a lower loss of transmission over distances.

What is the historical fiction about Tesla and Edison? The Last Days of Night.

Is the Edison story true? This story is based on fact but isn't actually true. There was no letter, however, the 7-year-old Thomas Edison did have a massive dislike of the school system, and his teacher. He was called out in class as being 'addled' and he stormed home in disgust.

The Procrastination Equation: How to Stop Putting Things Off and Start Getting Stuff Done

In his book "The Procrastination Equation," Piers Steel delves deep into the psychology of procrastination and offers practical strategies to overcome it.

Q: What is the "procrastination equation"?

A: Steel's equation is $U + E + V < H$. It suggests that procrastination occurs when the perceived unpleasantness (U) and effort (E) of a task outweigh the subjective value (V) of the task and our expectation of success (H).

Q: How do I determine the U, E, V, and H factors for a task?

A: To calculate U, consider how aversive you find the task. For E, estimate the amount of work and difficulty involved. V represents the personal importance and potential benefits of the task. H measures your confidence in your ability to complete it successfully.

Q: What can I do if the equation is not in my favor?

A: If $U + E + V < H$, you may find yourself procrastinating. To shift the equation in your favor, you can:

- **Change your perspective:** Reframe the task to make it seem less unpleasant or effortful.
- **Break down the task:** Divide it into smaller, more manageable chunks.
- **Focus on the value:** Remind yourself of the benefits of completing the task.
- **Set realistic expectations:** Adjust your H factor to reflect your actual capabilities.

Q: Are there any other strategies I can use?

A: In addition to the equation approach, Steel recommends:

- **The "two-minute rule":** If a task takes two minutes or less to complete, do it immediately.
- **The "Pomodoro technique":** Alternate focused work sessions (25 minutes) with short breaks (5 minutes).
- **The "eat the frog":** Tackle the most daunting task first thing in the morning.

Q: What are the benefits of overcoming procrastination?

A: Breaking the procrastination cycle can lead to:

- Increased productivity and efficiency
- Reduced stress and anxiety
- Greater sense of accomplishment and satisfaction
- Improved relationships and self-esteem
