What is the story of nobody's boy? *Nobody's Boy* is a French novel by Hector Malot, published for the first time in 1878. The story is set in the nineteenth century. An abandoned child, Remi, is sold by his adoptive parents to a mountebank. Browsing the English and French roads, the child held various jobs before discovering the secret of his origins.

What is the plot of the book Dear Nobody? *Dear Nobody* is a realistic young-adult novel by Berlie Doherty, published by Hamilton in 1991. Set in the northern England city of Sheffield, it features an unplanned teenage pregnancy and tells the story of its effect on the teenagers and their families.

What is the boy nobody knew about? Summary. "The Boy Nobody Knew" is a short story of a boy that no one knew because he had something's wrong with him. His mother and father hid him away in there apartment because they bid not want for him to be made fun of. He was called the boy nobody knew because no one knew that he lived there in there apartment.

What is the book nobody about? He, like Claire, is also a Nobody, trained from early on to be an assassin. When we first meet him, he is a brainwashed ruthless killer who thinks his only purpose in life is to carry out the directives of The Society; He is, after all, a Nobody. Soon the two are falling in love and plotting to take down The Society.

Solution to Exercise 3 in Murach's Java Programming Book

Question:

Exercise 3 of "Murach's Java Programming" book asks the reader to write a program that displays the average of three test scores. The program should prompt the user to enter each score and calculate the average.

Answer:

```

import java.util.Scanner;

public class AverageCalculator {

    public static void main(String[] args) {
        Scanner input = new Scanner(System.in);

        // Get the three test scores from the user
        System.out.print("Enter the first test score: ");
        int score1 = input.nextInt();

        System.out.print("Enter the second test score: ");
        int score2 = input.nextInt();

        System.out.print("Enter the third test score: ");
        int score3 = input.nextInt();

        // Calculate the average of the three scores
        double average = (score1 + score2 + score3) / 3.0;

        // Display the average to the user
        System.out.println("The average of the three test scores is: " +
        }
    }
}

```

Explanation:

The program starts by creating a `Scanner` object to read input from the user. It then prompts the user to enter the three test scores. The scores are stored in integer variables named `score1`, `score2`, and `score3`.

Next, the program calculates the average of the three scores using the formula $(score1 + score2 + score3) / 3.0$. The average is a double because it can contain a decimal value.

Finally, the program displays the average to the user using the `System.out.println()` method.

Output:

When the program is run, it will output the following:

```
Enter the first test score: 90
Enter the second test score: 85
Enter the third test score: 95
The average of the three test scores is: 90.0
```

Additional Notes:

- The program could be extended to allow the user to enter any number of test scores.
- The program could also be extended to calculate the median or mode of the test scores.
- The program could be further enhanced by adding error checking to ensure that the user enters valid test scores.

What is "Save the Cat!" by Blake Snyder?

"Save the Cat!" is a popular screenwriting book by Blake Snyder that outlines a 10-step formula for creating compelling and marketable screenplays. This formula aims to help writers engage audiences emotionally and create characters that they can root for.

Why is it called "Save the Cat"?

The title of the book comes from a specific moment in the scriptwriting process known as the "Save the Cat" moment. This moment occurs early in the story when the protagonist does something selfless or unexpected that makes the audience care about them. By "saving the cat," the protagonist shows their true nature and wins over the audience's sympathy.

What are the 10 steps of the "Save the Cat!" formula?

1. **Opening Image:** A striking image that sets up the protagonist's world and creates empathy.
2. **Theme Stated:** The theme of the story is introduced, often through dialogue or a visualization.

3. **Set-Up:** The protagonist's backstory, relationships, and desires are established.
4. **Catalyst:** An event that disrupts the protagonist's life and sets them on their journey.
5. **Debate:** The protagonist struggles with the decision to pursue or resist the journey.
6. **Break into Two:** The protagonist commits to the journey and enters a new world.
7. **B Story:** A parallel storyline develops, usually involving the protagonist's personal life.
8. **Fun and Games:** The protagonist explores the new world and enjoys their adventures.
9. **Midpoint:** A turning point that changes the direction of the story and raises the stakes.
10. **All Is Lost:** The protagonist faces their greatest challenge and seems to lose all hope.

How can "Save the Cat!" help you write better screenplays?

By following the "Save the Cat!" formula, writers can create scripts that are structured, emotionally engaging, and commercially viable. The formula provides a roadmap for creating a protagonist that audiences connect with and a story that keeps them invested.

Conclusion

"Save the Cat!" by Blake Snyder is a valuable resource for screenwriters looking to improve their craft. Its 10-step formula helps writers structure their stories, create likable characters, and evoke emotions in their audience. By applying the principles outlined in this book, writers can increase their chances of creating successful and memorable screenplays.

How do you journal depreciation of equipment? Depreciation expense is recorded as a debit to expense and a credit to a contra asset account, accumulated depreciation. The contra asset account is a representation of the reduction of the fixed asset's value over time.

What is the purpose of making a provision for depreciation in the accounts?

The purpose of providing depreciation on fixed asset is to ascertain true value of an asset, to replace asset, to ascertain correct profit or loss on sale of asset and to compute correct tax liability, etc.

What is the correct journal entry to record depreciation? Depreciation is recorded as a debit to a depreciation expense account and a credit to a contra asset account called accumulated depreciation.

What is the journal entry for depreciation method? Depreciation journal entries are designed to properly record the value and the cost of an asset over its useful life. To do this, a number of unique steps are taken. Most businesses follow a method of accounting known as the Generally Accepted Accounting Principles (GAAP).

How to treat provision for depreciation in trial balance? Assets is a debit balance on the TB. Therefore, provision for depreciation of a fixed asset is a credit balance. Provision for depreciation reduces the balance of a fixed asset. Therefore, it must be credited to reflect such reduction.

How to record provision for depreciation? Under provision for depreciation method of recording depreciation, Fixed asset is shown at its original cost on the asset side in balance sheet and depreciation till date is accumulated in provision for depreciation account which is shown on liabilities side in balance sheet.

What is the provision for depreciation notes? Provisions for Depreciation Journal Entry As long as the asset is in use, its cost is recorded in the asset account rather than being deducted from the asset's value at the end of an accounting year. This approach is used to record the following diary entries: The asset is purchased.

What is the double entry for depreciation? By this method the depreciation is shown in the fixed asset account, reducing the value of the asset each year, and in a depreciation expense account. The double entry is: debit the depreciation expense account; credit the fixed asset account.

What are the golden rules of accounting? The Three Golden Rules of Accounting These three golden rules of accounting: debit the receiver and credit the giver; debit what comes in and credit what goes out; and debit expenses and losses credit

income and gains, form the bedrock of double-entry bookkeeping.

What is the depreciation formula? To calculate using this method: Subtract the salvage value from the asset cost. Divide that number by the estimated number of hours in the asset's useful life to get the cost per hour. Multiply the number of hours (or units of production) in the asset's useful life by the cost per hour for total depreciation.

What is the adjusting entry for depreciation? The adjusting entry to record the depreciation expense involves debiting the depreciation expense account and crediting the accumulated depreciation account.

What is the difference between depreciation and amortization? Key Takeaways
Amortization and depreciation are two methods of calculating the value of business assets over time. Amortization is the practice of spreading an intangible asset's cost over that asset's useful life. Depreciation involves expensing a fixed asset as it's used to reflect its anticipated deterioration.

What is the accounting treatment of depreciation? Treatment of Depreciation in Final Account First, the amount of depreciation will be represented as an expenditure on the debit side of the Profit and Loss Account, and the amount of depreciation will be deducted from the related assets on the assets side of the Balance Sheet.

How do you show depreciation on equipment? Depreciation expense = (Cost – Salvage value) / Useful life For example, let's say you buy a piece of equipment for \$11 000 which has a useful life of 4 years. If its salvage value is \$1000, the depreciation expense will be \$2000 per year (based on the formula shown above).

What is the adjusting entry for depreciation of equipment? An adjusting entry for depreciation expense is a journal entry made at the end of a period to reflect the expense in the income statement and the decrease in value of the fixed asset on the balance sheet. The entry generally involves debiting depreciation expense and crediting accumulated depreciation.

What journal will you use to record the following transaction depreciation of equipment? Answer and Explanation: All non -cash, sales, and purchases are recorded in the related journals, and all other entries are recorded in the general

journal. The depreciation of computer equipment is non-cash and not related to sales or purchase transactions, and hence, will be recorded in the general journal.

What is the double entry for depreciation? By this method the depreciation is shown in the fixed asset account, reducing the value of the asset each year, and in a depreciation expense account. The double entry is: debit the depreciation expense account; credit the fixed asset account.
