Is Daytona 675 a good bike? Value vs rivals For the amount of performance you get, the Daytona 675R is excellent value for money and the cheaper, standard version even better. It's easier to ride fast than a litre bike and better spec'd than a Suzuki GSX-R750 and Ducati 848, so it's arguably one of the quickest A to B motorcycles you can buy.

Why was Daytona discontinued? Most likely due to a lack of demand and a slight increase in the number of listings, prices fell to \$220,000 by mid-September. As the year progressed and more and more sellers began listing Daytona Le Mans examples, prices continued to fluctuate.

Is the Daytona 675 a superbike? Though Triumph couldn't stick to its mouth-watering pricing, which it had released two years ago still the Daytona 675R has all

Is Triumph Daytona coming back? Triumph Daytona 660 is expected to launch in India in August 2024 in the expected price range of ₹ 11,00,000 to ₹ 12,00,000. Currently available bikes which are similar to Daytona 660 are Kawasaki Ninja 650, Kawasaki Z650 & Ducati Hypermotard 698 Mono.

Will Triumph Daytona come back? This asset is not currently visible to end users as its embargo time is in the future. Triumph has revealed an all-new triple powered middleweight sports bike for 2024. The Daytona 660 delivers thrilling sports performance, a dynamic ride and the highest quality, capability and specification in its class.

Is Triumph Street Triple 675 discontinued? Street Triple 675 ABS is discontinued.

Is there a recall on the 2007 Triumph Daytona 675? Triumph is issuing a recall on the Daytona 675, the Street Triple and the Street Triple R for model years 2006-2009. According to documents released by the National Highway Traffic Safety Administration, the regulator rectifier on the affected Triumph units may overheat, damaging its internal components.

Is the Triumph Daytona 765 discontinued? Well, put simply the Daytona is no more. Yes, the storied sportsbike was given a proper send off recently by marrying it to the 765 triple-cylinder engine that powers the entire Moto2 World Championship grid, but its limited numbers ensured it sold out long before we'd even tipped into 2020.
