Time Saver Standards for Interior Design and Space Planning by Joseph De Chiara: Q&A

Joseph De Chiara's "Time Saver Standards for Interior Design and Space Planning" is an indispensable resource for interior designers and space planners. It provides comprehensive data and insights to streamline the design process and ensure efficient space utilization. Here are some key questions and answers regarding this valuable publication:

1. What is the purpose of the Time Saver Standards? The Time Saver Standards is a compendium of design data, standards, and guidelines that help designers quickly estimate space requirements, select materials, and plan efficient layouts. It covers a wide range of topics, from furniture dimensions to lighting standards and building codes.

2. How can the Time Saver Standards save time? The Time Saver Standards eliminates the need for designers to spend countless hours researching data and calculating space requirements. It provides ready-to-use information that can be applied directly to projects, allowing designers to streamline their workflow and focus on the creative aspects of design.

3. What types of standards are included in the book? The Time Saver Standards includes a vast array of standards, including:

- Space planning standards for various building types, such as offices, retail stores, and healthcare facilities
- Furniture dimensions and space requirements
- Lighting standards and guidelines
- Building codes and regulations
- Material selection data

4. How is the book organized? The Time Saver Standards is organized into sections based on topic. Each section provides detailed tables, charts, and diagrams that present the information in a clear and concise manner. This organization allows designers to quickly find the data they need without having to search through multiple pages.

5. Who is the book intended for? The Time Saver Standards is primarily intended for interior designers and space planners. However, it can also be a valuable resource for architects, engineers, contractors, and anyone involved in the design or construction of buildings.
