Scoping Information Technology General Controls (ITGCs)

What are ITGCs?

Information Technology General Controls (ITGCs) are policies and procedures designed to ensure the reliability and integrity of an organization's financial and operational information systems. They are implemented to prevent, detect, and

correct errors or fraudulent activities that could result in significant financial or operational losses.

Why is Scoping ITGCs Important?

Scoping ITGCs is crucial for ensuring that the controls are relevant to the specific risks faced by an organization. It involves identifying and assessing the potential risks associated with the use of information technology and determining the appropriate controls to address those risks. Proper scoping ensures that the ITGCs are focused on the areas where they are most needed and that resources are allocated effectively.

How to Scope ITGCs

Scoping ITGCs involves a systematic approach that considers the following:

- Identify the organization's financial and operational risks related to information technology.
- Assess the likelihood and potential impact of these risks.
- Determine the existing ITGCs and their adequacy in mitigating the identified risks.
- Develop a plan to implement any necessary additional or enhanced ITGCs.

Types of ITGCs

ITGCs are typically categorized into two main types:

- **Preventive controls** aim to prevent errors or unauthorized activities from occurring in the first place. Examples include segregation of duties, data encryption, and access controls.
- **Detective controls** are designed to detect errors or unauthorized activities after they have occurred. Examples include data reconciliation, system logging, and audit trails.

Importance of Regular Review

ITGCs should be reviewed regularly to ensure that they remain relevant and effective in the face of evolving technologies and risks. This involves assessing the adequacy of existing controls, identifying any potential vulnerabilities, and making necessary adjustments to the scope and implementation of the ITGCs.
